

# Federal Business Opportunities (FedBizOpps) Update

Notices for January 6-12, 2014

This update contains summaries of procurement notices issued between January 6-12, 2014 that pertain to hazardous waste, investigation and cleanup of environmental contamination, and related environmental topics. However, it does not necessarily contain EVERY notice on these topics.

If you would like to search for additional current and archived notices, or receive notification of solicitation amendments, please visit the [FedBizOpps web site](#).

## **SOURCES SOUGHT FOR HAZARDOUS WASTE REMOVAL AND DISPOSAL IN ATLANTA, GA, SAN JUAN, PR, AND PORT EVER GLADES, FL (SRCSGT)**

**SOL:** FDA-SS-1128340

**DUE:** 011414

**POC:** Tomeka Evans, Contract Specialist, [Tomeka.Evans@fda.hhs.gov](mailto:Tomeka.Evans@fda.hhs.gov), 301-827-7168.

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/HHS/FDA/DCASC/FDA-SS-1128340/listing.html>

**NAICS:** 562211. The purpose of this sources sought notice is to gain industry input and knowledge of potential qualified sources and their business types (i.e. 8(a), HUBZone, service-disabled veteran-owned, economically disadvantaged women-owned, women-owned, small business, or large business) and classification relative to NAICS code 562211 (size standard \$35.5m) for hazardous waste treatment and disposal. Responses to this notice are for informational purposes only and are not considered offers. The Government will not pay for the information submitted in response nor will they notify respondents of the results of any government assessments. The information received will be utilized to assist in formulating an acquisition strategy. The Food and Drug Administration (FDA) is seeking sources to provide all necessary labor, permits, disposal arrangements, hauling, and equipment to properly remove and dispose of hazardous waste at FDA facilities located in Atlanta, GA, San Juan, PR, and Port Ever Glades, FL. The scope of work is for the proper collection, packaging, transportation, storage, and shipment of hazardous waste (solids, liquids, and, or gases) to an EPA registered and approved Treatment, Storage, and Disposal Facility (TSDF) or licensed facility or official DEA permitted incineration facility for disposal. Waste may include, but is not limited to, drug waste, chemical waste, radioactive waste, and Drug Enforcement Agency (DEA) registrant and confiscated drugs. DEA registered drugs must be disposed of at a registered, permitted and recommended drug disposal facility by the DEA. All radioactive waste must be disposed of at a waste disposal facility licensed by either NRC or an Agreement State. The radioactive material license and DEA registration and permit must be in current status. All waste removal, transport, and destruction must be in accordance with all applicable Federal, state, and local laws, rules, guidelines, and requirements to include those of the Occupational Safety and Health Administration (OSHA), Nuclear Regulatory Commission (NRC), Environmental Protection Agency (EPA), Department of Transportation (DOT), and the Drug Enforcement Administration (DEA) to ensure safe working conditions are met and the safe transport & disposal of the FDA hazardous waste. An on-site chemist shall be provided, when necessary, for both bulk waste disposal and chemical lab-packs for specific waste streams. The contractor shall be able to process bulk mixed liquid wastes and radioactive reference standards. The Contractor shall clean leaks and spills. The contractor shall recycle compatible wastes and incorporate green technologies, whenever possible, as part of our mandated green initiatives. Sources must sufficiently demonstrate the capability to perform these services and must provide detailed experience and qualifications in all previous work pertinent to this effort. The Government is interested in a Contractor that is able to perform work at all three sites; however, Contractors at individual sites will also be considered. **RESPONSES TO THIS SOURCES SOUGHT NOTICE ARE DUE TO THE CONTRACT SPECIALIST NO LATER 12:00 PM (NOON) ET ON JANUARY 14, 2014.** In your response you must include (a) your small business status (b) a positive statement of your intention to submit a quote for this solicitation as a prime contractor for an individual site or all sites; (c) evidence of experience in work similar in type and scope to include contract numbers, project titles, dollar amounts, points of contact and telephone numbers; (e) past performance references with points of contact and telephone numbers. At least two references are requested, but more are desirable. All of the above must be submitted in sufficient detail for a decision to be made. Failure to submit all information requested may result in an unrestricted acquisition. All correspondence shall be directed to the Contract Specialist. Email is the preferred method of communication.

## **SERVICE TO ANALYZE DRINKING WATER FOR SOC AND VOC (SRCSGT)**

**SOL:** M67001-14-Q-0013

**DUE:** 011514

**POC:** Mark Silang, Contract Specialist, [mark.silang@usmc.mil](mailto:mark.silang@usmc.mil), 910-451-9615.

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/DON/USMC/M67001/M67001-14-Q-0013/listing.html>

**NAICS:** 541380. THIS IS A SOURCES SOUGHT SYNOPSIS ONLY. This is NOT a request for quotation and in no way obligates the Government to award any contract/purchase order. The purpose of this sources sought synopsis is to seek out interested small businesses capable of fulfilling the service requirement. The MCI-East Contracts Department and Marine Corps Base Lejeune Environmental Division are performing market research to determine available sources that can provide services to perform tests on drinking water samples from water treatment systems located aboard Camp Lejeune Complex and provide reports resulting from the tests. See the notice at FBO.gov for a list of the chemicals identified for testing. Responses to this notice should include company name, address, telephone number, point of contact, and additional information that will help the government to understand the capability of your company to perform the required services. The applicable NAICS code is 541380. In addition, interested vendors shall provide the following information: (1) Is your business a large or small business under this NAICS code? (2) If the size standard is small, indicate if your firm is certified under Section 8(a) of the Small Business Act, if your firm is a certified HUBZone firm, if your firm is women-owned, and/or if your firm is Service-Disabled Veteran-Owned. (3) Are the services available under a GSA/FSS contract? If so, please provide contract number. (4) These services been acquired by any government agencies? If so, please provide names of agencies, POCs and contract numbers. (5) Cage Code and DUNS Number. Cage Code and DUNS number must be registered on Systems for Award Management (<https://www.sam.gov>). Responses to this sources sought notice shall be e-mailed to [mark.silang@usmc.mil](mailto:mark.silang@usmc.mil). Telephone responses will not be accepted. **RESPONSES MUST BE RECEIVED NO LATER THAN 15 JANUARY 2014 AT 12:00 PM EST.**

**NAICS:** 541380. The 502d Contracting Squadron at Randolph AFB, TX has a requirement to purchase laboratory analysis services in accordance with the items set forth in the Description of Services below. This is a combined synopsis/solicitation for commercial items prepared in accordance with the format in FAR Subpart 12.6 and in conjunction with FAR Subpart 13.5 as supplemented with additional information included in this notice. This announcement constitutes the only solicitation; quotes are being requested and a written solicitation will not be issued. Solicitation F3P3A33221A001 is issued as a Request for Quotation (RFQ). The NAICS Code for this

acquisition is 541380 and the associated small business size standard is \$14 Million. THIS REQUIREMENT IS 100% SMALL BUSINESS SET-ASIDE. This combined synopsis/solicitation incorporates provisions and clauses in effect through Federal Acquisition Circular 2005-72. This combined synopsis/solicitation is NOT to be construed as a commitment by the United States Air Force. The Government is NOT liable for any costs and/or activity associated with providing a response to this announcement. Any costs incurred as a result of a response to this announcement shall be borne by the firm and will not be charged to the government for reimbursement. Description of Services: Provide all labor, materials, tools, equipment, and supervision necessary to perform Laboratory Analysis for Asbestos and Lead Samples under the Contract Line Item Numbers (CLINs) shown in the text of the notice at FBO.gov. FOB Point: Destination Randolph AFB. Period of Performance: One (1) year from award date. [See the notice at FBO.gov for the applicable FAR clauses.] Responses to this notice shall be provided in writing via e-mail to Danita Porter-McGee, at [danita\\_porter-mcgee.1@us.af.mil](mailto:danita_porter-mcgee.1@us.af.mil) and copied to Vivian Fisher, at [vivian.fisher@us.af.mil](mailto:vivian.fisher@us.af.mil). ALL RESPONSES SHALL BE RECEIVED NLT 4:00 PM ON 17 JANUARY 2014. Email is the preferred method. Late offers may not be considered.

#### **20--DISASSEMBLY AND TEARDOWN OF RADIOLOGICALLY CONTAMINATED US NAVY LM2500 GAS GENERATORS (SRCSGT MOD)**

**SOL:** N0002413R4207

**DUE:** 012014

**POC:** Stacy Kirsch, [stacy.kirsch@navy.mil](mailto:stacy.kirsch@navy.mil), 202-781-5124; Mark Burns, [mark.e.burns@navy.mil](mailto:mark.e.burns@navy.mil).

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/DON/NAVSEA/NAVSEAHQ/N0002413R4207/listing.html>

**NAICS:** 336412. The Naval Sea System Command (NAVSEA) is hereby issuing a Request for Information (RFI) seeking information regarding the disassembly and radiological surveying of General Electric LM2500 Marine Gas Generators used aboard US Navy surface ships. NAVSEA seeks to determine the industry capability, estimated costs, and steps required to complete the following: - Receive radiologically contaminated US Navy LM2500 Gas Generator Assets - Establish or possess a facility capable of processing LM2500 Gas Generator - Execute a complete disassembly of the asset in accordance with existing US Navy technical documents governing the depot overhaul of the LM2500 Gas Generator which will be provided. - Radiologically survey and disposition each part according to their level of radiological contamination as either above or below the permissible limits as defined the American National Standard Institute Standard (ANSI) 13.12 and Nuclear Regulatory Commission (NRC) Regulatory Guide 1.86 (less than 1000dpm per 100 square cm loose or removable contaminants and less than 6000dpm per 100 square cm total). [NOTE: THE ORIGINAL SOURCES SOUGHT WAS ISSUED DECEMBER 28, 2012, AND UPDATED JANUARY 16, 2013.] Added: Jan 06, 2014 8:21 am, STATUS UPDATE FOR FY14: As a result of budget sequestration, NAVSEA did not have sufficient FY13 funds to pursue LM2500 radiological inspection work with industry beyond issuing this RFI. NAVSEA is still interested in pursuing the project with industry. If you still have an interest in this work then it is recommend that you continue to monitor FedBizOpps in FY14. Any future information or solicitations that NAVSEA may choose to issue regarding this topic will utilize FedBizOpps.

#### **R--EXPOSURE ASSESSMENT FOR TOXIC SUBSTANCES (SRCSGT)**

**SOL:** SOL-DC-14-00011

**DUE:** 012114

**POC:** Jennifer Kuhn, [kuhn.jennifer@epa.gov](mailto:kuhn.jennifer@epa.gov).

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/EPA/OAM/HO/SOL-DC-14-00011/listing.html>

**NAICS:** 541620. The US Environmental Protection Agency (EPA), Office of Acquisition Management (OAM) is conducting market research to identify potential small business sources (including 8(a), veteran-owned small business, service-disabled veteran-owned small business, HUB Zone small business, small disadvantaged business, and women-owned small business concerns) with the capacity and technical capability necessary to successfully perform the requirements described herein. The subject requirement will provide scientific technical support for EPA's Office of Chemical Safety and Pollution Prevention (OCSPP), Economics, Exposure, & Technology Division (EETD). The purpose of this requirement is to provide for the performance of exposure assessments, utilizing existing EPA development procedures, and for the development of relevant technical information necessary for EPA to develop new exposure assessments procedures in order to fulfill the requirements of the Toxic Substance Control Act (TSCA), the Pollution Prevention Act, and any executive order or other legislative requirement made of the OCSPP. These services are currently provided by the incumbent, Versar, Inc. (Versar), under EPA contract EP-W-10-005. The current contract is scheduled to expire December 31, 2014. The proposed acquisition is valued at approximately \$8-10 million, including all options. The Government anticipates awarding a five year cost-reimbursement type contract in accordance with the procedures under FAR Part 15 - Contracting by Negotiation. The North American Industry Classification System (NAICS) code for this procurement is 541620. The small business size standard for this NAICS category is \$14.0 million in annual receipts (or income) as defined under 13 CFR 121.104. This is not a request for technical or cost proposals. This is a sources sought notice for written information only. THE PURPOSE OF THIS NOTICE IS TO INVITE INTERESTED SMALL BUSINESS CONCERNS TO SUBMIT A BRIEF CAPABILITY STATEMENT delineating a business approach for meeting the requirements in the draft Performance Work Statement (PWS). The Government does not intend to award a contract on the basis of this notice or reimburse the costs incurred by potential offerors in providing the information requested herein. Capability statements must address technical competencies, and management/personnel experience relative to: (1) the key task areas in the draft PWS; and, (2) the overall business demands of the proposed acquisition for the best mix of cost, performance, and schedules. In addition, capability statements must address the concern's capacity to manage the anticipated volume of work for this requirement. Finally, general financial and organizational information should be provided concerning: (1) average number of employees of the concern; (2) average annual receipts based on the last 3 fiscal years; and (3) a description of other current business commitments (i.e., contracts, etc.). Interested parties shall be concise in their capability statements, and limit responses to no more than 10 double-sided pages. Capability statements shall be responsive to all information items requested herein to allow for an accurate business assessment. Standard brochures and paraphrasing of the PWS will not be considered a sufficient response to this notice. Feedback and/or evaluation information will not be provided to any firm regarding their individual capability statements; and no telephone calls and/or requests for a solicitation will be accepted. All responses should only be sent via email to [kuhn.jennifer@epa.gov](mailto:kuhn.jennifer@epa.gov). THE DEADLINE FOR SUBMITTING CAPABILITY STATEMENTS IS JANUARY 21, 2014 BY 8:00 AM ET. Please see the following link for more information, including the Draft PWS: <http://www.epa.gov/oamhpod1/pcsc/14jq006/index.htm>.

**NAICS:** 541620. THIS PROCUREMENT IS A COMPETITIVE SET-ASIDE FOR 8a BUSINESSES. Examples of specific services include tasks such as operating, maintaining, and optimizing pollution control or remedial system equipment; characterizing waste streams; performing environmental monitoring, sampling, and analysis; operating a hazardous waste accumulation site; and updating existing environmental plans. Contractor personnel shall possess appropriate certifications and training to accomplish the required services, as specified. The Contractor shall perform all work in a professional and timely manner in accordance with all applicable regulations, requirements and permits. Services are projected to be required in each contract year. Projections of requirements beyond the basic

contract year are subject to change and will be confirmed as each option year is issued. THE RESPONSE DATE IS JANUARY 24, 2014.

#### **SUPPORT CONTRACT FOR THE NATIONAL TOXICOLOGY PROGRAM (NTP) INTERAGENCY CENTER FOR THE EVALUATION OF ALTERNATIVE TOXICOLOGICAL METHODS (NICEATM) (SRCSGT)**

**SOL:** NIEHS2014003

**DUE:** 012714

**POC:** Juanita A Campbell, Contracting Officer, [campbell@niehs.nih.gov](mailto:campbell@niehs.nih.gov), 919-541-7893, Fax: 301-451-5400.

**WEB:** <https://www.fbo.gov/spg/HHS/NIH/NIEHS/NIEHS2014003/listing.html>

**NAICS:** 541712. THIS IS A SMALL BUSINESS SOURCES SOUGHT NOTICE. This is NOT a solicitation for proposals, proposal abstracts, or quotations. The purpose of this notice is to obtain information regarding: (1) the availability and capability of qualified small business sources; (2) whether they are small businesses; HUBZone small businesses; service-disabled, veteran-owned small businesses; 8(a) small businesses; veteran-owned small businesses; woman-owned small businesses; or small disadvantaged businesses; and (3) their size classification relative to the North American Industry Classification System (NAICS) code for the proposed acquisition. Your responses to the information requested will assist the Government in determining the appropriate acquisition method, including whether a set-aside is possible. An organization that is not considered a small business under the applicable NAICS code should not submit a response to this notice. BACKGROUND: The mission of the National Institute of Environmental Health Sciences (NIEHS) is to discover how the environment affects people in order to promote healthier lives. The National Toxicology Program (NTP) was organized to address increasing scientific, regulatory, and Congressional concerns about the human health effects of chemical agents in our environment. NICEATM contributes to the mission of NIEHS and the NTP by evaluating, developing, validating, and promoting the acceptance and utilization of improved safety assessment tools to protect, promote, and advance the health of people, animals, and the environment. The NICEATM Office is located at NIEHS [Research Triangle Park (RTP), NC] and consists of two Government Staff members augmented with appropriate contract support. In addition to supporting NIEHS and NTP, NICEATM is also responsible for ensuring compliance with duties and provisions of the Interagency Coordinating Committee on the Validation of Alternative Methods (ICCVAM) Authorization Act of 2000 (42 U.S.C. 2851-3). The overall goal of ICCVAM is to promote the research, development, validation, evaluation, acceptance, and use of new and alternative testing methods and strategies that are more predictive of human health and ecological effects than currently available methods and strategies. ICCVAM is a statutorily mandated interagency committee established under NICEATM. NICEATM carries out its mission by performing independent Research and Development (R&D) activities, reviewing proposed test methods, organizing workshops, and facilitating peer reviews. Proposed test methods include those submitted to ICCVAM by developers that include a complete submission package as well as those nominated by the general public or the Member Agencies making up ICCVAM that require additional validation studies, also supported through this effort. PURPOSE AND OBJECTIVES: The objective of this effort is to provide scientific and administrative support for NICEATM. NICEATM research supports activities of the NTP's Biomolecular Screening Branch (BSB), the Tox21 consortium, and the ICCVAM. PROJECT REQUIREMENTS: This effort requires that Contract Staff be physically located in close proximity (within 30 minute drive) to the NIEHS campus. The nature of the support role requires frequent, often impromptu, in-person meetings with NICEATM Government Staff members. Contract staff must be prepared to meet with NICEATM Government Staff daily (2-4 hours) and on short-notice (within two hours of request). In addition, a high degree of collaboration between staff, especially toxicologists, computational toxicologists, and bio/cheminformaticists is required. Therefore, all contract staff are required to be co-located (in the same physical location) in order to facilitate a collaborative environment with frequent interactions between staff. TECHNICAL REQUIREMENTS: Pre-Validation Screening - The Contractor shall acquire and apply new and existing scientific knowledge to develop, evaluate, and validate novel computational approaches that can be used for chemical prioritization, hazard identification and risk assessment with direct relevance to human health; Research, Development, and Validation of Alternative Test Methods - In order to promote the research, development, validation, acceptance, and use of new and alternative testing methods and strategies, ICCVAM coordinates the evaluation of submitted and nominated test methods; Test Method Pre-Screen Evaluations and Pre-Screen Evaluation Report - The Contractor will receive Test Method Submission/Nomination Packages for evaluation. The Contractor shall review the information provided in the Test Method Submissions/Nominations for completeness with regard to each of the ICCVAM validation and acceptance criteria; Coordination of Validation Studies - Occasionally, additional validation studies of Test Method Submissions/Nominations will be necessary. The Contractor shall support tasks involved with the coordination of validation study(ies); Test Method Background Review Documents (BRDs) - the Contractor shall develop Background Review Documents (BRDs), in Draft and Final Draft versions, organize the comprehensive BRDs, provide a compilation of reference lists of chemicals/substances recommended for use in validating test methods, structure each BRD in a monograph format, present the document in an electronic camera-ready format as appropriate for NIH publications, and coordinate the printing and distribution of those documents designated as NIH publications; Test Method Technical Review Document - the Contractor shall assemble a Test Method Technical Review Document. Each Test Method Technical Review Document shall include all available information submitted, obtained, and/or analyzed during the pre-screen process, including the Pre-Screen Evaluation Report and/or the Background Review Document; Test Method Evaluation Report (TMER) - the Contractor shall assemble a Test Method Evaluation Report (TMER) for all Test Method Submissions/Nominations progressing through peer reviews. General Meeting Support for NICEATM- and ICCVAM-related Meetings [including ICATM (International Cooperation on Alternative Test Methods) and ICATM-Partner Agency Meetings] - The Contractor shall provide support for all meetings deemed necessary to carry out the goals and objectives of NICEATM and ICCVAM; The Contractor shall provide support to NICEATM in preparing updates to documents including but not restricted to the NTP Annual Report, the NICEATM/ICCVAM Five-Year Plan, General Strategic Plan, Standard Operating Procedures, and/or other planning and procedural documents within the scope of the Statement of Work. ANTICIPATED PERIOD OF PERFORMANCE: The Government anticipates a one-year (12 Months) contract with four optional years (12 Months each). The anticipated award date is November 5, 2014. An additional option to extend services not to exceed 6 months shall be included in accordance with FAR Clause 52.217-8. If the Government exercises its option(s) the period of performance will be increased accordingly. OTHER IMPORTANT CONSIDERATIONS: The Contractor shall comply with Government Conflict of Interest requirements. The Contractor shall adhere to Government Information Technology (IT) requirements including but not limited to the submission of Section 508-compliant deliverables. The Government anticipates that key personnel shall, at a minimum, include the Principal Investigator and the Senior Toxicologist, and shall be employees of the Contract organization. The Principal Investigator shall have a Ph.D. or comparable doctoral degree in the Life Sciences or Chem/Bio-informatics with a strong background in toxicology. The Senior Toxicologist shall have a Ph.D. and relevant experience and expertise. Certification by the American Board of Toxicology is required. LEVEL OF EFFORT (LOE)- The Government's estimated base requirement for the work is 20,520 direct labor hours for the initial period of performance (12 months) and each additional optional period of performance, excluding vacation, holiday, and sick leave. In addition, it is anticipated that additional LOE may be required throughout the life of the contract. It is anticipated that Optional LOE shall not exceed 9,500 hours per year excluding vacation, holiday, and sick leave. This information is furnished for information only and is not to be considered restrictive. CONTRACTOR TRAVEL - It is anticipated that Contract Staff may need to travel (domestic and foreign) to support NICEATM/ICCVAM-related meetings and to present data at professional meetings. ADDITIONAL OPTIONS include but are not limited to: Workshop/Meeting Support, and Validation Study Support. GOVERNMENT FURNISHED PROPERTY (GFP) - The Government does not anticipate supplying the Contractor with Government-furnished property, equipment, or facilities. CAPABILITY STATEMENT/INFORMATION SOUGHT: Capability Statements should include information regarding respondents': (a) staff expertise, including their availability, experience, and formal and other training; (b) current in-house capability and capacity to perform the work; (c) prior completed projects of similar nature; (d) corporate experience and management capability; and (e) examples of prior completed Government contracts, references, and other related information; respondents' DUNS number, organization name, address, point of contact, and size and type of business (e.g., 8(a), HUBZone, etc.) pursuant to the applicable NAICS code. Capability Statements should be limited to 5 pages. The information should be provided in Microsoft Word, Adobe PDF, or Microsoft Power Point, or equivalent accessible format, in no less than a ten (10) pitch font. Information shall include respondents' technical and administrative points of contact, including names, titles, addresses, telephone and fax numbers, and e-mail addresses. Submit electronic responses to [Juanita.Campbell@niehs.nih.gov](mailto:Juanita.Campbell@niehs.nih.gov). Telephone and facsimile responses will NOT be accepted. RESPONSES MUST BE RECEIVED BY JANUARY 27, 2014, 12:00 PM EASTERN TIME.

**NAICS:** 541330. A mudslide triggered by Hurricane Ivan's storm surge toppled a platform at Mississippi Canyon (MC) Lease Block 20. The platform's wells were covered by more than 100 feet of mud and sediment and as a result of structural damage, plumes containing crude oil and gas discharged into the Gulf of Mexico, creating a sheen on the surface of the water. To mitigate the discharge, in 2009, a subsurface containment system was installed at the MC 20 site, however, there continues to be a visible crude oil sheen on the surface of the water daily. The subsea containment system consists of: three 2700 cubic foot (100barrel capacity) steel domes, hoses, a marker buoy and a 50 barrel oil/water separator. U.S. Coast Guard administrative order 12-001 directed the Platform Owner to begin the design a new pollution dome system that is suitable for the environmental conditions found at the MC20 discharge site. The dome system is located at Mississippi Canyon Lease Block 20, south of New Orleans, LA (approximately 12 miles from shore), centered at 28 degrees 56' 12.619" and 088 degrees 58' 10.303" W. The water depth is approximately 440 feet. An engineering consultant is required to assist the USCG by evaluating and making recommendations to modify, re-design and/or un-install the current subsea containment system at MC 20 and also review new proposed containment system to eliminate the ongoing sheen and recover product. The USCG requires an engineering consultant to assist with an independent government assessment on the effectiveness of a new dome system. This assessment requires unique skills and capabilities related to hydrocarbon emissions through fine grained sediments, as well as marine structure engineering and the underlying physical processes associated with natural hydrocarbon seepage; skills not currently available within the U.S. Coast Guard. The contractor shall meet the following requirements: 1. Expertise in seabed flux measurements of oil and gas from natural and anthropogenic sources. 2. Expertise in analyzing temporal and spatial variability in seabed emissions. 3. Expertise in design, implementation, and failure modes of containment systems for collecting oil and gas at the seabed 4. Expertise in geologic controls on variability in emissions. 5. Expertise in oil volumetric estimation on the sea surface and in oil slick processes affecting oil slicks on the sea surface. 6. Expertise in modeling the fate of oil and gas droplets in the water column -- a key factor to containment system design.

**NAICS:** 562910. This is a combined synopsis/solicitation for commercial services prepared in accordance with the format in Subpart 12.6 as supplemental with additional information included in this notice. Various equipment and internal building surfaces need to be cleaned for metal contamination only (barium, cadmium, lead, nickel, arsenic, chromium, and zinc) that were found to be elevated and are suspected of being elevated in adjoining areas in a former manufacturing building at the Federal Correctional Institution, 741-925 Herlong Access Road, A-25, Herlong, California 96113. This solicitation number is Request for Proposal (RFP) EP2795-14. The solicitation document and incorporated provisions and clauses are those in effect through Federal Acquisition Circular 2005-72. The North American Industry Classification System code is 562910. THIS REQUIREMENT IS 100% SET ASIDE FOR A SMALL BUSINESS. UNICOR, Federal Prison Industries, Inc., intends to award a firm-fixed price, DD-DQ contract for the item(s) noted within the RFP. Mandatory Site Visit date is January 28, 2014 at 10:00 A.M. local time. Please read the requirements set out in the solicitation if you plan to participate in the site visit and will be providing a solicitation response. RESPONSES ARE DUE BY FEBRUARY 5, 2014.

**NAICS:** 236220. This is presolicitation notice VA259-14-R-0104: A REQUEST FOR PROPOSAL WILL BE POSTED ON OR ABOUT THE WEEK OF 3 FEBRUARY 2014. The general scope of this project consists of complete asbestos abatement, remediation and restoration in Buildings 1, 8, and 20 of the VA Montana Miles City Campus, VA Montana Healthcare System, 210 South Winchester, Miles City, MT 59301. The intent of the project is to abate all asbestos to remove the entire liability from the primary complex on the Mile City Campus. The site visit time/ date will be announced in the RFP. The NAICS code for this procurement is 236220 with a small business size standard of \$33.5 M. The magnitude of this project is between \$1,000,000.00 and \$5,000,000. THIS PROJECT WILL BE 100% SET-ASIDE FOR SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESSES, as stated below. The POC for this project is

[Tracy.Jackson2@va.gov](mailto:Tracy.Jackson2@va.gov) and 303-372-7044. Important Notice: Apparent successful offerors must apply for and receive verification from the Department of Veterans Affairs Center for Veterans Enterprise (CVE) in accordance with 38 CFR Part 74 and VAAR 819.70 by submission of documentation of Veteran status, ownership and control sufficient to establish appropriate status, offerors must be both **VISIBLE** and **VERIFIED** by the Department of Veterans Affairs Center for Veterans Enterprises at the time of submission of proposal. Failure to be both **VERIFIED** by CVE and **VISIBLE** on VetBiz at the time of proposal submission will result in the offeror's proposal being deemed non-responsive. All offerors are urged to contact the CVE and submit the aforementioned required documents to obtain CVE verification of their SDVOSB status if they have not already done so. VA NOTICE OF TOTAL SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS SET-ASIDE (DEC 2009) -- (a) Definition. For the Department of Veterans Affairs, "Service-disabled veteran-owned small business concern": (1) Means a small business concern: (i) Not less than 51 percent of which is owned by one or more service-disabled veterans or, in the case of any publicly owned business, not less than 51 percent of the stock of which is owned by one or more service-disabled veterans (or eligible surviving spouses); (ii) The management and daily business operations of which are controlled by one or more service-disabled veterans (or eligible surviving spouses) or, in the case of a service-disabled veteran with permanent and severe disability, the spouse or permanent caregiver of such veteran; (iii) The business meets Federal small business size standards for the applicable North American Industry Classification System (NAICS) code identified in the solicitation document; and (iv) The business has been verified for ownership and control and is so listed in the Vendor Information Pages database, (<http://www.VetBiz.gov>). (2) "Service-disabled veteran" means a veteran, as defined in 38 U.S.C. 101(2), with a disability that is service-connected, as defined in 38 U.S.C. 101(16). (b) General. (1) Offers are solicited only from service-disabled veteran-owned small business concerns. Offers received from concerns that are not service-disabled veteran-owned small business concerns shall not be considered. (2) Any award resulting from this solicitation shall be made to a service-disabled veteran-owned small business concern. (c) Agreement. A service-disabled veteran owned small business concern agrees that in the performance of the contract, in the case of a contract for: (1) Services (except construction), at least 50 percent of the cost of personnel for contract performance will be spent for employees of the concern or employees of other eligible service-disabled veteran-owned small business concerns; (2) Supplies (other than acquisition from a non-manufacturer of the supplies), at least 50 percent of the cost of manufacturing, excluding the cost of materials, will be performed by the concern or other eligible service-disabled veteran-owned small business concerns; (3) General construction, at least 15 percent of the cost of the contract performance incurred for personnel will be spent on the concern's employees or the employees of other eligible service-disabled veteran-owned small business concerns; or (4) Construction by special trade contractors, at least 25 percent of the cost of the contract performance incurred for personnel will be spent on the concern's employees or the employees of other eligible service-disabled veteran-owned small business concerns. (d) A joint venture may be considered a service-disabled veteran owned small business concern if (1) At least one member of the joint venture is a service-disabled veteran-owned small business concern, and makes the following representations: That it is a service-disabled veteran-owned small business concern, and that it is a small business concern under the North American Industry Classification Systems (NAICS) code assigned to the procurement; (2) Each other concern is small under the size standard corresponding to the NAICS code assigned to the procurement; and (3) The joint venture meets the requirements of paragraph 7 of the explanation of Affiliates in 19.101 of the Federal Acquisition Regulation. (4) The joint venture meets the requirements of 13 CFR 125.15(b). (e) Any service-disabled veteran-owned small business concern (non-manufacturer) must meet the requirements in 19.102(f) of the Federal Acquisition Regulation to receive a benefit under this program.

**NAICS:** 562910. NOTICE - The Previous ASFI synopsis was W911RP-13-R-0011, change to W911RP-14-R-0004 - The Contracting Division, Pine Bluff Arsenal (PBA), Pine Bluff, Arkansas 71602-9500, has a requirement for a contractor to provide all labor, equipment and supplies to perform all aspects of CAT-I tank testing and CAT-II tank residue removal/disposal of tank binding and removal. The contractor must be certified in Steel Tank Institute (STI) standard SP001 to perform non-destructive integrity testing of in-service (CAT-1) above ground storage tanks (ASTs) to include the cleaning, blinding and removal of specific out-of-service (CAT-II) ASTs and underground storage tanks (USTs) at PBA. Without draining the tanks and without significant disruption of PBA's operation, the contractor will test and evaluate each AST and their respective valves and piping, in accordance with applicable Steel Tank Institute (STI) or American Petroleum Institute (API) standards with one of the following external, non-destructive integrity testing technique as stated within the Federal regulations 40 CFR 112.8 (6): (1) Hydrostatic testing (2) Radiographic Testing Ultrasonic testing (d) Acoustic testing or (e) another system of non-destructive shell testing. After such testing completed, the contractor will replace or reinstall any tank insulation or out shell material that was removed during testing. The contractor shall develop a report of all findings; recommendations regarding the continued use of the tank and test results and will, at the completion of the project, submit the report, in electronic (compact disk) and hard copy format to PBA Environmental. All work shall be performed in accordance with Pine Bluff Arsenal's Scope of Work. The North American Industry Classification System NAICS code 562910 (19.0 M). THIS IS A 100% SMALL BUSINESS SET-ASIDE. All contractors must be registered in SAM. Solicitation will be posted on the FBO.gov website. Solicitation W911RP-14-R-0004 will be issued o/a 14 February 2014 with a closing date of o/a 20 Mar 2014. Solicitation may be obtained via email request to [retha.j.sprinkle.civ@mail.mil](mailto:retha.j.sprinkle.civ@mail.mil). Point of contact is also Retha Sprinkle, Contract Specialist, 870-540-3054, Fax No: 870-540-3730.
