NAICS: 562211. A sources sought is a market research tool being used to determine availability and adequacy of potential business sources prior to determining the method of acquisition. The intent of this sources sought synopsis is to identify qualified HUBZone, 8(a), woman-owned, service-disabled veteran-owned, and small businesses for a firm-fixed-price IDIQ contract for RCRA Hazardous, State-Regulated, Compressed Gas Cylinders, Polychlorinated Biphenyls (PCBs), and Non-Hazardous Waste Removal, Transportation, and Disposal for DLA Disposition Services Offices at Ft Bliss, Cannon AFB, Holloman AFB, Kirtland AFB, and surrounding areas in the states of Texas and New Mexico. All services necessary for the collection, storage, processing, removal, transportation, final treatment and disposal of waste will be in accordance with all local, state, Army, Air Force, DoD, Navy, and federal laws and regulations. Special services are also required such as management services, analysis and testing, and tank cleaning. Upon review of industry response to this Sources Sought Synopsis, the Government will determine whether a set-aside acquisition is in the Government's best interest. The duration of the contract is anticipated to be for one 30-month base period from the date of initial contract award and will include one 30-month option. CAPABILITIES STATEMENTS (3 pages max) MUST BE RECEIVED AT THE OFFICE BY OR BEFORE 3:00 PM ET ON THURSDAY, JANUARY 12, 2017.

LEAD-BASED PAINT RENOVATION TRAINING (COMBINE)

SOL: RFQ-IL-17-00006

DUE: 011317

POC: Thomas Knight, (312) 353-2000, Fax: (312) 353-4135, Knight.Thomas@epa.gov.

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/EPA/OAM/MMC-101/RFQ-IL-17-00006/listing.html>

NAICS: 611699. The prevalence of childhood lead poisoning in the U.S. continues to present a problem, especially in underserved communities. According to the Centers for Disease Control and Prevention, about 1 in 24 children (4.2%) in America in 2014 have elevated levels of lead in their blood greater than or equal to 5 micrograms per deciliter, largely because about 30 million American homes still contain lead-based paint, and those dwellings in disrepair are a major source of exposure. The City of Chicago, Illinois, and other major metropolitan areas in Region 5 have some of the highest incident rates of elevated blood-lead levels in the country, higher than the national rate of lead poisoning. In addition, the current situation in Flint, Michigan, has created opportunity to implement solutions that can ultimately eliminate lead exposures. In 2008, EPA expanded its regulatory capacity through adoption and implementation of its Lead Renovation, Repair and Painting (RRP) Rule to prevent and control exposures to lead-based paint and dust. Specifically, the RRP regulation requires contractors to be certified and trained in the use of lead-safe work practices when performing renovations in older (pre-1978) homes. EPA expects that implementing the lead-safe work practices required under the RRP regulation will help control and eliminate lead paint hazards, provide for lead-safe housing, and help eradicate this preventable childhood disease. The ultimate objective of the project is to decrease the number of children with elevated blood-lead levels in older housing stock in these cities and neighborhoods. To eliminate exposure to lead-based paint through proper renovation, there is a greater demand for certified RRP specialists. With

this training, there will be an increase in the number of professionally certified renovators in Chicago and several other environmental justice communities in Region 5. By using the skills learned during the training, renovators will be able to conduct renovation activities in a manner that results in less exposure to children and adults due to lead-based paint hazards from the renovation activities. This training will also help provide local residents with knowledge and skills for meaningful employment. 1) A contractor, an EPA-accredited trainer (hereinafter referred to as "trainer"), will conduct at least five training classes on EPA's Renovation, Repair, and Painting Rule (RRP). At least one training class will be located in environmental justice communities in each following five Region 5 cities: Chicago, IL, Gary, IN, Detroit, MI, Flint, MI, and Cleveland, OH. In addition, consideration will be given to having a class in a Spanish speaking community, presented in Spanish, in one of the cities depending on the city and/or community organization needs. 2) The trainer is responsible for providing and/or using the facility, advertising, EPA model training materials, certified instructor(s), and training certificate/registration, and complying with applicable state and/or local requirements. 3) The trainer must contact and work closely with the local county, city, and community organizations to announce the training and secure a local community facility for the training. The announcements for the training will be conducted with a preference for residents and workers in the communities in which the training is taking place, and will include the following statement: "This training is being funded by the U.S. Environmental Protection Agency, Region 5 Office in Chicago, Illinois." 4) The trainer must meet with EPA prior to initiating the project and submit a progress report to EPA every two weeks, by email. 5) The trainer must also follow up with the students or the local county, city, and/or community organizations after completion of the training to identify if students were able to secure any jobs with the new RRP training and certifications. This must be done within one month from the date that the training was conducted. 6) The trainer will train 125 students under this contract. The trainer will seek to have average class sizes of 25 students in the 5 communities. 7) The training will be free for the 125 students trained under this contract. The funds under this contract will be used to cover the students' training and certification, in addition to covering the provisions identified in the preceding paragraph. 8) The training will include but is not limited to background information on the hazards of lead contamination; the need for lead-safe work practices; site preparation; proper handling and disposal of the material; HUD and OSHA requirements; administration of paperwork; testing; and other city, state, and federal requirements. Upon successful completion of the training, trainees will receive certification under the RRP from the trainer. 9) All of the training classes will be conducted by August 31, 2017, with completion of the project, including follow up with the students or local county, city, and/or community organization, as specified in item 5, above, by September 30, 2017. 10) The training must be conducted by the recipient of this contract and cannot be sub-contracted to another trainer. Trainers for this project (also considered contractors for the purpose of this project) will be selected from a list of training providers that have been accredited (approved) by Region 5 with the following conditions. The trainers must be accredited to provide training on the RRP, have a sufficient number of principal instructors, and be accredited to train at non-permanent facilities which are consistent with the site selection criteria in their approved application. The selection of trainers for this project will be based on the quality of their proposals, technical knowledge, training experience, compliance history, and the bids. All of the training classes will be conducted by August 31, 2017, with completion of the project, including follow up with the students or local county, city, and/or community organization, as specified in item 5, above, by September 30, 2017.

NAICS: 562910. This Sources Sought is a market research tool being utilized to determine the availability of qualified small business concerns prior to issuing a Request for Proposal. This is not a solicitation for proposals and a contract will not be awarded as a result of this announcement. In accordance with FAR 5.2, the Indian Health Service is conducting market research and is issuing a Sources Sought notice to complete hazardous material surveys and provide Professional Abatement and Demolition cost estimates. When the San Carlos Apache Tribe's New Apache Healthcare Center opened in Peridot, AZ, in 2015, it replaced the Old San Carlos Hospital, which was built in San Carlos, AZ, in 1961. While several of the Old Hospital Complex's buildings have been retained for use by the Indian Health Service (IHS), 12 of the original buildings have been selected for demolition. Those 12 buildings include the Main Hospital building and an Outpatient addition, as well as four freestanding departmental buildings (Dental, Offices, Maintenance and an Annex) and six residential properties. Because hazardous materials are present in all 12 buildings, it is necessary to abate them prior to their demolition and disposal. The tentative Scope of Work might include: 100% Hazardous Materials Survey/Validation, and Abatement/Demolition Plans and Specifications Professional Cost Estimate Submittal: The Contractor shall submit a 100% Hazardous Materials Survey/Validation, and Abatement/Demolition Plans and Specifications and a Cost Proposal Submittal for IHS review and comment. The estimated price range of any

resultant contract is between \$25,000 and \$100,000. The NAICS code is 562910, Remediation Services, with a Small Business Size Standard of \$20.5M. Items that potential offerors need to be aware of are: 1) Notice see HHSAR 352.226-1 Indian Preference (Dec 2015); 2) TERO fees or Tribal Taxes. Interested small businesses are invited to respond to this sources sought using the form attached to the FedBizOpps notice. RESPONSES ARE DUE BY OR BEFORE 1:00 PM PT ON JANUARY 20, 2017.

A--SBIR PHASE II COMMERCIALIZATION OPTIONS NOI FOR SOLE SOURCE (SNOTE)

SOL: RFQ-RT-17-00022

POC: Jeffery Clodfelter, Clodfelter.Jeffery@epa.gov.

NAICS: 541712. The U.S. Environmental Protection Agency (EPA) in Research Triangle Park, NC, intends to award four sole-source purchase orders under the authority of FAR Part 13, Simplified Acquisition Procedures, to four companies to procure Small Business Innovation Research (SBIR) Phase II Commercialization Options. The four companies (listed below) were all awarded Phase II SBIR contracts under solicitation SOL-NC-14-00003. SBIR Phase II contracts have two objectives: The first is to continue the R&D initiated under Phase I and take it at least through full-scale testing of the technology. The second is to work with partners, investors, and customers to fully commercialize the technology and obtain widespread utilization. EPA committed funds and intended to exercise the Commercialization Options but did not complete the modifications prior to the expiration of the Four Phase II SBIR contracts. The Commercialization Options are required to meet the second objective of the SBIR Phase II contracts. Four SBIR Phase II Contracts and Companies: (1) EP-D-15-005 Ecovative Design, LLC; (2) EP-D-15-006 EP Purification, Inc.; (3) EP-D-15-008 Imaging Systems Technology, Inc.; and (4) EP-D-15-010 Instrumental Polymer Technologies, LLC. The circumstance permitting is FAR 13.106-1 (b) "Soliciting from a single source." All details pertaining to this notice are posted only on FedConnect at <https://www.fedconnect.net/FedConnect/?doc=RFQ-RT-17-00022&agency=EPA> [Note: It might be necessary to copy and paste the URL into your browser for direct access.].
