**NAICS:** 562112. This procurement is unrestricted. The purpose of the service contract is to clean and remove waste from Hazardous Waste Accumulation Points (HWAPs) and Hazardous Material Storage Areas (HMSAs) located at USAG Bavaria (Hohenfels). Waste will be disposed of at the US SORT facility on post. The removal and disposal of hazardous waste from the Sort Facility is performed under a different contract. HWAPs serve for the collection of hazardous wastes that accumulate at vehicle maintenance areas and in motor pools. HMSAs serve for the storage of hazardous material for the shops and units. Contractor should coordinate with the unit so that the HMSA is emptied before for the cleaning service. Secondary containment of HWAPs and HMSAs are to be steam cleaned. Work shall include the removal of vegetation in and around the facility within 1 m perimeter. OFFERS ARE DUE BY OR BEFORE 10:00 AM PT ON AUGUST 10, 2016.

## INDUSTRIAL HYGIENE SURVEY (COMBINE)

**SOL:** N68335-16-T-0420

**DUE:** 081216

**POC:** Michael Withrow, Contract Specialist, [michael.withrow@navy.mil](mailto:michael.withrow@navy.mil), 732-323-1682; Kevin P. Smith, Contracting Officer, [kevin.smith11@navy.mil](mailto:kevin.smith11@navy.mil), 732-323-7789.

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/DON/NAVAIR/N68335/N68335-16-T-0420/listing.html>

**NAICS:** 541620. This announcement constitutes the only solicitation; quotations are being requested and a written solicitation will not be issued. Vendors shall provide a fixed price for the following requirements: (1) Conduct quarterly personnel monitoring to evaluate exposure to heavy metals including the 6 most common metals -- cadmium, lead, nickel, zinc, aluminum, and hexavalent chromium -- in the walk-in blast booth located in Building 200, hand blast cabinet in Building 200, and the welding process in Building 200 weld shop for one year. (2) Conduct a one-time surface swab sampling for heavy metals in designated areas throughout the facility, to include the office, two change rooms, weld shop, blast cabinet, and two work spaces. Evaluate the housekeeping program currently in place and ensure PPE protocols are appropriate to working environment. Recommend changes as necessary based on results. (3) Conduct quarterly surface swab sample for heavy metals in designated change rooms, lunchroom and office area. (4) All monitoring conducted should address, as applicable, the following areas as it pertains to exposure to airborne

contaminants present in the work environment per the OSHA, ACGIH, and NIOSH standards: Recommended Exposure Limit (REL); Permissible Exposure Limit (PEL); Short Term Exposure Limit (STEL); and Time-Weighted Average Threshold Limit Value (TLV). (5) Conduct one-time noise monitoring to evaluate exposure to noise levels at the blast booth and blast cabinets located in Building 200 as well as the welding process in Building 200 weld shop. Evaluate the noise monitoring program currently in place and ensure PPE protocols and appropriate working environment. Recommend changes as necessary based on results. THE SOLICITATION IS OPEN TO SMALL BUSINESSES ONLY, NAICS code 541620, with a small business size standard of 500 employees. SUBMIT QUOTATIONS BY OR BEFORE 5:00 PM ET ON AUGUST 12, 2016.

**NAICS:** 562910. This synopsis is for information and planning purposes only. This notice is a SOURCES SOUGHT synopsis issued by the U.S. Coast Guard, Shore Infrastructure Logistics Center (SILC) (COCO-BSS-cob-1), Norfolk, VA, to identify sources capable of providing emergency response services for the containment, cleanup, and/or mitigation of the harmful effects of oil spills and hazardous substance incidents on or in waters subject to the jurisdiction of the United States, within the areas of responsibility of all U.S. Coast Guard Districts; the First, Fifth, Seventh, Eighth, Ninth, Eleventh, Thirteenth, Fourteenth and Seventeenth Coast Guard Districts. The primary area of coverage will encompass the entire United States and its territories, including but not limited to Puerto Rico, the Virgin Islands, Guam, the Mariana Islands, and American Samoa. Contractor(s) shall be required to provide all labor, materials, equipment, transportation and supervision necessary to perform services. The Coast Guard intends to negotiate a Time and Material Type Basic Ordering Agreement (BOA) with environmental contractors selected as a result of this sources sought notice. No written solicitation exists; all information is provided at FedBizOpps. Prospective contractors having the skills and capabilities necessary to perform the stated requirement are invited to provide a letter of interest and capabilities via email. SUBMIT CAPABILITIES STATEMENTS BY OR BEFORE 4:00 PM ET ON AUGUST 26, 2016.

**REMOVAL AND DISPOSAL OF AQUEOUS FILM-FORMING FOAM (AFFF) CONCENTRATES AND RINSATES LOCATED AT VARIOUS UNITED STATES AIR FORCE ACTIVITIES THROUGHOUT THE CONTINENTAL UNITED STATES (CONUS) (COMBINE)**

**SOL:** SP4500-16-R-0012

**DUE:** 082916

**POC:** Daniel Schuemann, Contracting Officer, [daniel.schuemann@dla.mil](mailto:daniel.schuemann@dla.mil), 269-961-5238, Fax: 269-961-4417.

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/DLA/J3/DRMS/SP4500-16-R-0012/listing.html>

**NAICS:** 562211. This contract is for the removal and disposal of Aqueous Film-Forming Foam (AFFF) concentrates and rinsates located at various United States Air Force activities throughout the Continental United States (CONUS). AFFF concentrates and rinsates will be thermally destroyed at a fully permitted RCRA incineration facility. Concentrates and rinsates are defined in section 1.2.8.3 of this contract. For purposes of this contract, incineration will constitute treatment and disposal. Scheduling of removals will be coordinated between the Contractor and the centralized Defense Logistics Agency Disposition Services (DLADS) office located in Battle Creek, MI. Copies of shipping papers and other pertinent documents will be submitted to the DLA Representative (DLAR) located at a centralized DLADS office as prescribed in Section 1.1.2 of the contract. Pricing for disposal CLINs will include the removal, transportation, treatment and disposal of wastes contained in pails, drums, and totes, and will be based upon the volumetric capacity/size of these containers. The AFFF concentrates and rinsates are liquid wastes being discarded by the Government and will meet the EPA definition of a solid waste, but will not meet the definition of a RCRA hazardous waste. Generators are responsible for ensuring their containerized wastes turned in for disposal are in appropriate packaging for safe and secure transportation and storage. Removal of waste containers for all sites is 90 calendar days from the date of order issuance, barring unforeseen complications regarding Contractor access to certain sites/activities. This contract consists of one 18-month Base Period. It is a firm-fixed-price IDIQ contract written as a performance-based contract. The Bid Schedules and quantities have been split into 3 different regions (East, West, and Central). Pricing for each schedule will be evaluated independently, and may result in the award of individual schedules to different offerors or one award with three schedules to one offeror; however, no individual schedule will be awarded to more than one offeror. All questions regarding this solicitation must be received no later than 4:30 PM ET on August 17, 2016. OFFERS MUST BE RECEIVED BY OR BEFORE 04:30 PM ET ON AUGUST 29, 2016.

**NAICS:** 541330. This acquisition will be used to procure highly specialized services required to provide A-E services in support of USACE in executing the Defense Logistics Agency-Energy (DLA-E) Fuels Leak Detection Program at locations

worldwide. This procurement may award up to one \$60M unrestricted IDIQ single-award task-order contract (SATOC), one \$20M small business IDIQ SATOC, and one \$10M service-disabled veteran-owned small business (SDVOSB) IDIQ SATOC. The Government will compete the \$60M unrestricted SATOC for Fuels System Leak Detection services at all locations under the responsibility of the DLA to include both CONUS and OCONUS work. The Government will compete the \$20M SB and \$10M SDVOSB SATOCs for Fuels System Leak Detection services at CONUS-only locations under DLA responsibility. The Government may award less than three SATOCs depending on the source selection decision regarding how many contractors are considered most highly qualified in accordance with Brooks Act procedures. The total capacity of all awards will be \$90M over a 5-year period of performance. All firms responding to this solicitation must identify in which category they are submitting. Selection of A-E firms is not based upon competitive bidding procedures, but rather upon the professional qualifications necessary for the performance of the required services. The SF 330, 3/2013 edition, must be used to submit qualifications. The Government will only enter into negotiations with the firm(s) considered most highly qualified. The NAICS code for this action is 541330. SF330 PACKAGES MUST BE RECEIVED BY OR BEFORE 2:00 PM CT ON AUGUST 29, 2016.

**NAICS:** 562211. THIS SOLICITATION IS ISSUED UNDER FULL AND OPEN COMPETITION. This contract requires the transportation and disposal of RCRA wastes, non-RCRA wastes, compressed gas cylinders, and polychlorinated biphenyls (PCBs). This contract is a firm-fixed-price IDIQ contract written as a performance-based contract. Pricing for containerized waste will largely be based upon a per pound basis. Generators are not responsible for ensuring their containerized wastes sent for disposal via this contract are in Department of Transportation (DOT) shippable packaging. This contract is for various military and Government activities, which may encompass several states. Standard removal timeframe for all sites is 21 calendar days from the date of order issuance. Loading of bulk solids and pumping of bulk liquids may take up to one full work day under certain circumstances and the Government will not allow additional compensation for these tasks unless they exceed one complete 8-hour workday. This contract will have one 24-month base period. All questions regarding this solicitation must be received no later than 12:00 noon ET, August 17, 2016. OFFERS MUST BE RECEIVED BY OR BEFORE 12:00 PM ET ON AUGUST 31, 2016.

**NAICS:** 541330. THIS ANNOUNCEMENT CONSTITUTES A SOLICITATION FOR SUBMITTAL OF SF330s. Selection of A-E firms is not based upon competitive bidding procedures, but rather upon the professional qualifications necessary for the performance of the required services. Only firms considered most highly qualified will be awarded a contract. Multiple awards will be made from this solicitation. A-E Services are required for an IDC to provide a full range of comprehensive engineering services to Mobile District to support the Water and Wastewater Technical Center of Expertise (TCX). Under this solicitation, the Government plans to issue one Unrestricted IDIQ Single-Award Task-Order Contract and up to two Small Business IDIQ contracts, each with a 5-year period of performance. The Government may award less or more than its intent depending on the source selection decision regarding how many contractors are considered most highly qualified in accordance with Brooks Act procedures. The total capacity of all awards will be \$10M: \$4M Unrestricted Shared Capacity and \$6M Small Business Set-Aside Shared Capacity. All firms responding to this solicitation must identify in which category they are submitting. Interested A-E firms or joint ventures having the capabilities to perform the work described in the FedBizOpps notice are invited to submit an SF330 package. **NAICS:** 562910. The U.S. Army Corps of Engineers, Philadelphia District, intends to make a single award in whole to the lowest priced responsive and responsible bidder. THIS PROCUREMENT IS RESTRICTED TO SMALL BUSINESSES. This acquisition is a firm-fixed-price procurement using FAR PART 14 procedures, for remedial action at the Watson Johnson Landfill (WJL) located at 680 East Pumping Station Road, Quakertown, PA 18951. The period of performance for the base bid is 120 calendar days. Bidders are urged and expected to inspect the site where the work will be performed. A single organized site visit is scheduled for August 26, 2016; ergo, bidders are expected to contact the POC identified in the solicitation within 4 calendar days of the solicitation posting to coordinate their participation. The remedial action at the WJL site includes installation of a 21.4-acre multi-layer landfill cap. Award of this contract is subject to the availability of funds. The estimated cost range of the project is between \$5M-\$10M. The NAICS Code for this project is 562910, with a small business size standard of \$20.5M. Davis Bacon rates will be applicable to the contract. RELEASE OF THE SOLICITATION IS ANTICIPATED ON OR ABOUT AUGUST 12, 2016, with a bid opening date of September 15, 2016.

**ANALYSIS OF TREATMENT WETLANDS (SNOTE)**

**SOL:** P16PS02256

**POC:** Celinda Hicks, 305-242-7700, Fax: 305-242-7795, [Celinda\\_Hicks@nps.gov](mailto:Celinda_Hicks@nps.gov).

**NAICS:** 541620. The National Park Service, Southeast Region intends to award a firm-fixed-price contract with a base and four option periods, for water quality analyses and modeling that are needed to improve and protect the quality of water in and entering Department of the Interior Trust Lands (ARM Loxahatchee National Wildlife Refuge (LNWR), Everglades National Park (ENP), Big Cypress National Preserve, and Biscayne National Park) that insures that the unique flora and fauna within them will be preserved for future generations. This requirement is being procured in accordance with FAR Part 6.302-3, Industrial mobilization; engineering, developmental, or research capability; or expert services. The determination to select Wetland Management Services for the water-quality analyses and modeling is that the company has been responsible for all elements of water quality analyses and modeling since a lawsuit filed by the United States against the State of Florida in 1988 over nutrient pollution issues. A Settlement Agreement was reached in 1991 and a Consent Decree was established in 1994. That agreement required the State of Florida to implement sufficient phosphorus control measures to achieve water quality standards throughout the Everglades marsh by December 2006. Dr. Kadlec of Wetland Management Services has a unique expertise in the project and has an irreplaceable level of experience that is required to complete the work. Continuing with the same water modeling and analysis is essential in the continuation of the services. This minimizes the risk of the project owner (the park) and reduces the delivery schedule. Additionally, staying with one firm throughout the process is in the best interest of the Government because it decreases costs on the overall project. Familiarizing a new firm with the requirement is not beneficial to the productivity of this project. Dr. Kadlec is very familiar with project and has done outstanding work for the Department of the Interior. NAICS Code: 541620, Environmental Consulting Services, Standard business size is \$15M. The National Park Service is presently using FedBizOpps to point to issuance on FedConnect of the synopsis for Notice of Intent to Award Sole Source Justifications. The synopsis may be viewed online only on FedConnect at <https://www.fedconnect.net/FedConnect/?doc=P16PS02256&agency=DOI> [Note: It might be necessary to copy and paste the URL into your browser for direct access.]. All questions pertaining to the synopsis can be directed to [celinda\\_hicks@nps.gov](mailto:celinda_hicks@nps.gov) or call (305) 242-7742. A solicitation will not be released for this requirement. This is a notice of intent to award on a sole-source basis to Wetland Management Services.
