

Federal Business Opportunities (FedBizOpps) Update

Notices for February 20-26, 2017

This update contains summaries of procurement notices issued between February 20-26, 2017 that pertain to hazardous waste, investigation and cleanup of environmental contamination, and related environmental topics. However, it does not necessarily contain EVERY notice on these topics.

If you would like to search for additional current and archived notices, or receive notification of solicitation amendments, please visit the [FedBizOpps web site](#).

SOURCES SOUGHT FOR WASTE WATER PUMPING (SRCSGT)

SOL: W911SA-17-Q-0083

DUE: 022817

POC: Katie Oppen, katie.i.oppen.civ@mail.mil, 608-388-5535.

WEB: FBO.gov Permalink at <https://www.fbo.gov/notices/ef7ffddbb207d0f92d0246e4dbbc9d65>

NAICS: 562211. This notice is a Sources Sought synopsis ONLY. Wastewater pumping services are a new requirement for the 88th RSC as described in the draft Performance Work Statement (PWS) attached to the FedBizOpps notice. The U.S. Government desires to procure wastewater pumping services in multiple states ON A SMALL BUSINESS SET-ASIDE BASIS, provided 2 or more qualified small businesses respond to this sources sought with information sufficient to support a set-aside. Be advised that the U.S. Government will not be able to set aside this requirement if 2 or more small businesses do not respond with information to support the set-aside. All small businesses in all socioeconomic categories are encouraged to identify their capabilities in meeting the requirement at a fair market price. This notice is issued solely for information and planning purposes - it does not constitute an RFQ or an RFP or a promise to issue such in the future. If a solicitation is released, it will be synopsized on FedBizOpps. The anticipated NAICS code is 562211 (Hazardous Waste Treatment and Disposal), with a size standard of \$38.5M. The estimated period of performance consists of a base period and four option periods, with a 6-month option to extend services. Performance commences 01 April 2017. CAPABILITIES STATEMENTS ARE DUE BY OR BEFORE 10:00 AM CT ON FEBRUARY 28, 2017, via email to katie.i.oppen.civ@mail.mil.

F--CHEMICAL SPILL RESPONSE (SRCSGT)

SOL: VA26117Q0326

DUE: 022817

POC: Rico Johnson, rico.johnson@va.gov.

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/VA/VANCHCS/VANCHCS/VA26117Q0326/listing.html>

NAICS: 562910. This notice is a sources sought for market research purposes only. The Department of Veterans Affairs is in the process of determining the acquisition strategy for Hazardous Spill Cleanup services for the VA Palo Alto Health Care System, with locations in Palo Alto, Menlo Park, and Livermore, California. Please note that this request for information does not constitute a solicitation for competitive bids/proposals. The contractor shall be qualified to carry out wide range of spill response services for hazardous chemicals, nonhazardous chemicals, universal waste, and DEA drug waste emergency spills; manpower to transport hazardous waste in relationship to a spill response from all facilities within VAPAHCS to a central accumulation area or to a Treatment Storage and Disposal Facility on an as-needed basis. This contract will not include the disposal of radiological, infectious or bio-hazardous waste, but may include small quantities of dual waste (i.e., infectious and hazardous waste). The Contractor shall provide all labor; supervision; materials; equipment; sanitized, disinfected, and labeled containers; transportation; facilities; supplies; and waste manifests. Contractor shall collect, analyze, prepare, package, label, remove, transport, store, treat, and dispose of Hazardous waste under the resulting contract in accordance with the terms, conditions, and specifications of the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) and with all federal, state, and local (U.S. EPA, DOT) laws, policies and guidelines, and VA infectious medical waste requirement. The period of performance is a single base year plus 4 option years. The NAICS code is 562910, with a small business size standard of \$15M. The information received as a result of this notice will be considered solely for the purpose of determining whether to conduct a competitive procurement. SUBMIT CAPABILITIES STATEMENTS BY OR BEFORE 2:00 PM PT ON FEBRUARY 28, 2017.

R--TECH SUPPORT FOR IMPLEMENTATION OF THE UNREGULATED CONTAMINANT MONITORING REGULATION (UCMR 4) AND DRINKING WATER STANDARDS DEVELOPMENT (SRCSGT)

SOL: SOL-CI-17-00032

DUE: 031917[?]

POC: Donna Reinhart, reinhart.donna@epa.gov.

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/EPA/OAM/OH/SOL-CI-17-00032/listing.html>

NAICS: 541620. This is a sources sought synopsis for written information only; no contract will be awarded from this announcement. U.S. EPA's Office of Water, Office of Ground Water and Drinking Water (OGWDW), Technical Support Center requires contractor support to provide technical, analytical, and administrative support services for the Unregulated Contaminant Monitoring Regulation (UCMR). EPA OGWDW is responsible for implementing the provisions of the Safe Drinking Water Act (SDWA) section 1445(a)(2), "Monitoring Program for Unregulated Contaminants," which requires that once every five years EPA is to issue a new list of no more than 30 unregulated contaminants to be monitored by public water systems (PWSs). The UCMR requires PWSs to collect occurrence data for contaminants that may be present in drinking water but are not yet subject to EPA's SDWA drinking water standards. This rule benefits public health by providing EPA and other interested parties with scientifically valid data on the national occurrence of selected contaminants in drinking water. This dataset is one of the primary sources of information on occurrence, levels of exposure and population exposure the Agency uses to develop regulatory decisions for contaminants in the public drinking water supply. SDWA requires that EPA (1) have direct implementation responsibilities (with state assistance through Partnership Agreements); (2) enter the monitoring data into the Agency's publically available National Contaminant Occurrence Database; and (3) ensure that systems serving a population larger than 10,000 people, as well as a nationally representative sample of PWSs serving 10,000 or fewer people, are required to monitor. EPA must also vary the frequency and schedule for monitoring based on the number of persons served, the source of supply, and the contaminants likely to be found. The final UCMR 4 (<https://www.epa.gov/dwucmr/fourth-unregulated-contaminant-monitoring-rule>) identifies 11 analytical methods to support water system monitoring for a total of 30 chemical contaminants, consisting of nine cyanotoxins and one cyanotoxin group; two metals; eight pesticides plus one pesticide manufacturing byproduct (hereinafter collectively referred to as pesticides); three brominated haloacetic acid disinfection byproducts groups; three alcohols; and three SVOCs. The proposed contract will have a base period of 12 months with five option periods of 12 months each, for a total potential period of performance of six years. Total maximum level of effort for this 6-year period of performance is 104,400 direct labor hours. It is anticipated that a cost-plus-fixed-fee/level-of-effort contract will result from this solicitation. The applicable NAICS code is 541620 with a size standard of \$15M in average annual receipts. In their capabilities statements, contractors must provide their size status for the above referenced NAICS code, (i.e. large, small) and whether or not they are a certified HUBZone, 8(a), woman-owned, small-disadvantaged, and/or service-disabled veteran-owned concern. EPA reserves the right to set this action aside for small businesses. A draft

copy of the performance work statement (PWS) is available only on FedConnect at https://www.fbo.gov/?s=opportunity&mode=form&id=096cedfde4261bfaf55c5279e2ec4c0f&tab=core&_cview=0 [Note: It might be necessary to copy/paste the URL into your browser for direct access to the FedConnect page]. Significant potential exists for an organizational conflict of interest under any resulting procurement; hence, areas of concern are identified in the "Draft COI Clauses" attachment at FedConnect. Interested parties with the capability of providing any of the services described in the draft PWS are invited to submit a 10-page capabilities statement. Tasks anticipated in this procurement include: 1) Coordinate the preparation and distribution of UCMR sample collection kits for selected small systems; 2) Provide outreach support to the UCMR implementation effort; 3) Collect and track data for the UCMR program; 4) Assist with contacting public water systems (or States) regarding UCMR responsibilities and monitoring requirements; 5) Assist with the design of UCMR Monitoring Plans and coordinate state review; and 6) Assist with oversight and coordination of the UCMR laboratory approval program. SUBMIT CAPABILITIES STATEMENTS THROUGH FEDCONNECT BY OR BEFORE 4:00 PM ET ON MARCH 9, 2016 [2016 is possibly a typo]. Submit any questions regarding the content of this sources sought synopsis announcement through FedConnect. A separate synopsis will be issued for the Request for Proposal resulting from this sources sought. The resulting contract will be a follow-on to contract EP-C-12-057 with Great Lakes Environmental Consultants.

HAZARDOUS WASTE REMOVAL AND DISPOSAL AT HILL AFB AND SURROUNDING LOCATIONS (COMBINE)

SOL: SP4500-17-R-0001

DUE: 040517

POC: Reid Blosser, Contract Specialist, reid.blosser@dla.mil, 269-961-5131; Daniel Schuemann, Contracting Officer,

daniel.schuemann@dla.mil, 269-961-5238, Fax: 269-961-4417.

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/DLA/J3/DRMS/SP4500-17-R-0001/listing.html>

NAICS: 562211. This contract requires the transportation and disposal of RCRA hazardous wastes, non-RCRA wastes, state-regulated wastes, non-state regulated wastes, compressed gas cylinders, and polychlorinated biphenyls (PCBs) for various military and Government activities, which may encompass multiple states. Standard removal timeframe for containerized waste at all sites is 14 calendar days from the date of order issuance. The Contractor agrees that, for those portions of the services provided on a Government installation, the services will be provided during normal hours of operations for the installation, which are available, upon request, from the COR. This contract is a firm-fixed-price IDIQ contract written as a performance-based contract and allows the Contracting Officer to make monetary deductions and/or a negative mark on the Contractor's Past Performance when an Acceptable Performance Level (APL) is not met. This contract consists of two 30-month performance periods. Pricing for containerized waste will largely be based upon container sizes and the assigned disposal profile, rather than pricing on a per pound basis. Generators are responsible for ensuring their containerized wastes sent for disposal via this contract are in Department of Transportation (DOT) shippable packaging. The Tooele South facility requires Certificates of Disposal for all their waste, which is to be included in the unit price. The email address for submission of offers is reid.blosser@dla.mil. OFFERS ARE DUE BY OR BEFORE 4:30 PM ET ON APRIL 5, 2017. THIS ACQUISITION IS UNRESTRICTED.

NAICS: 562910. THIS ACQUISITION IS TO BE COMPETED AS A 100% SMALL BUSINESS SET-ASIDE as part of the U.S. Army Corps of Engineers, Southwestern Division's Multiple Award Task Order Contract (MATOC) for Environmental Remediation Services (ERS). This synopsis is a presolicitation notification only. The USACE Fort Worth District intends to issue Solicitation No. W9126G-17-R-0057 for a firm-fixed-price, indefinite-delivery MATOC for ERS for projects within the geographic boundaries of the Southwest Division (SWD) and projects assigned to the SWD for support in maintaining compliance with all applicable federal and state environmental regulations and Army guidance, regulations, and requirements. In addition to ensuring regulatory compliance, the mission will identify existing or potential environmental hazards and develop initiatives to improve environmental compliance to enhance and protect natural, historical, and archeological resources. Work to be performed under this contract may include but is not necessarily limited to preparation of work plans; studies with associated reports; multiple phases of field investigations; preliminary assessments; site inspections and remedial site inspections; remedial investigations; feasibility studies; engineering evaluation-cost analysis (EECA) and other planning documents; monitoring well installation and sampling; short and long term monitoring/long term operations or long term response actions; data management; data interpretation; engineering evaluation and corrective actions; optimization studies; groundwater modeling; geophysical surveys; remediation cost estimates; management of non-hazardous and hazardous investigation-derived waste; environmental and human health risk assessments; risk-based remediation; air emission issues, including vapor intrusion; surface water discharge, applying for environmental permits, remedial design; well abandonment; meetings; public meeting participation; preparation of presentation material both written and visual; hydrological, sediment and soil studies; project reports; engineering support; value engineering studies; O&M for HTRW and MMRP sites; energy evaluations for remediation systems; remedial action plans; remedial actions; removal action plans; removal actions; construction support; range clearance activities; site closeout/decision documents; abandoned mines program support; and future project programming and scheduling support. Wage Determinations will be incorporated with each task order, if required. This will be a performance-based procurement. Scope specifics will be defined/detailed and monitored under each task order. This solicitation will facilitate award of up to five IDCs with a maximum shared capacity of \$45M. Contracts will have a base period of three years and one two-year option period. The applicable NAICS code is 562910, Environmental Remediation Services, with an associated small business size standard of 750 employees. The solicitation will be issued via FedBizOpps only. THE ANTICIPATED SOLICITATION ISSUE DATE IS ON OR ABOUT MARCH 13, 2017, with proposals likely to be due on or about April 12, 2017. Once the solicitation is issued, submit all technical questions via the ProjNet/Bidder's Inquiry System; additional information about the use of the ProjNet website will be included in the solicitation.
