

Federal Business Opportunities (FedBizOpps) Update

Notices for June 25-July 1, 2018

This update contains summaries of procurement notices issued between June 25-July 1, 2018 that pertain to hazardous waste, investigation and cleanup of environmental contamination, and related environmental topics. However, it does not necessarily contain EVERY notice on these topics.

If you would like to search for additional current and archived notices, or receive notification of solicitation amendments, please visit the [FedBizOpps web site](#).

CLEAN UP HEXAVALENT CHROMIUM CONTAMINATION (SRCSGT)

SOL: W911S2-18-U-3616

DUE: 070618

POC: Alfredo Milan Sanchez, Contract Specialist, alfredo.m.sanchez.civ@mail.mil, 315-772-9903.

WEB: FBO.gov Permalink at <https://www.fbo.gov/notices/c1a675b36f36f1c43e1851c0ec2de791>

NAICS: 562910. This sources sought notice constitutes market research to enable the development of a future acquisition strategy. The U.S. Government requires a contractor to furnish all, labor, equipment and material to clean surfaces contaminated with dust containing hexavalent chromium [Cr(VI)] from an aviation hangar located on Wheeler-Sack Army Airfield, Fort Drum, NY. The Government wants to pursue this requirement as a small business set-aside basis, provided 2 or more qualified small businesses respond to this sources sought synopsis with information sufficient to support a set-aside. Be advised that the U.S. Government will not be able to set aside this requirement if 2 or more small businesses do not respond with information to support the set-aside. Small businesses in all socioeconomic categories (including 8(a), small disadvantaged, HUBZone, service-disabled veteran-owned, and woman-owned small business concerns) are encouraged to identify their capabilities in meeting the requirement at a fair market price. This notice is issued solely for information and planning purposes and does not commit the U.S. Government to contract for any supply or service. The anticipated NAICS code is 562910 (Remediation Services), size standard \$20.5M. Some of the duties include cleanup of the aviation hangar bay and cleanup of select hangar administrative areas. The period of performance is expected to be 90 days. STATEMENTS OF INTEREST AND CAPABILITY MUST BE RECEIVED NO LATER THAN 12:00 NOON ET ON JULY 6, 2018. If a solicitation is issued, it will be announced at a later date.

NAICS: 541620. ALTHOUGH THE GOVERNMENT INTENDS TO SOLICIT AND AWARD TO A SINGLE 8(A) COMPANY WITH A FIRM-FIXED-PRICE IDIQ CONTRACT, responses to this synopsis from small business concerns will be used to validate the proposed set-aside or support dissolving current 8(a) set-aside arrangement. Please describe conditions, if any, that might limit small business participation in this requirement. The Mission and Installation Contracting Command (MICC), Fort Hood, Texas, on behalf of White Sands Missile Range, NM, is issuing this sources sought synopsis as a means of conducting market research to identify parties having an interest in and the resources to support the requirement for Environmental Consulting Services. The proposed contract is a re-procurement. The environmental compliance requirement includes adhering to NEPA and RCRA. The requirement includes hazardous waste handling and management, archaeological mission support and surveys, and Integrated Training (and Testing) Area Management (ITAM) under the Sustainable Range Program. A draft Performance Work Statement is attached to the FedBizOpps announcement. The Government will evaluate market information to ascertain potential market capacity to: 1) provide services consistent in scope and scale with those described in this notice and otherwise anticipated; 2) secure and apply the full range of corporate financial, human capital, and technical resources required to successfully perform similar requirements; 3) implement a successful project management plan that includes compliance with tight program schedules, cost containment, meeting and tracking performance, hiring and retention of key personnel, and risk mitigation; and 4) provide services under a performance based service acquisition contract. The expected NAICS code is 541620 (Environmental Consulting Services), size standard \$15M. The requirement is presently fulfilled through current contract # W91151-17-D-0007. The anticipated period of performance is one base year of 12 months, and four 12-month option years. Interested parties are invited to submit a capabilities statement (10 pages max).

CAPABILITIES STATEMENTS MUST BE RECEIVED VIA EMAIL NO LATER THAN 11 AM CT ON JULY 6, 2018. Upon evaluation of the capability statements, if it is determined that this requirement will be an unrestricted competition, the Government intends to evaluate the small business responses and conduct further market research to identify a subcontracting goal.

F--SERVICES; ENVIRONMENTAL REMEDIATION SERVICES (COMBINE)

SOL: 36C24818Q0826

DUE: 070918

POC: Elena Bass (Contract Specialist), elena.bass@va.gov, 727-399-0554; Steven Scharlow (Contracting Officer), steven.scharlow@va.gov, 727-399-3307.

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/VA/BPVMC/VAMCCO80220/36C24818Q0826/listing.html>

NAICS: 562910. THIS ACQUISITION IS A 100% SDVOSB SET-ASIDE UNDER NAICS code 562910. This solicitation is a

request for quotations. The Network Contracting Office 8-SAO East intends to award a fixed-price requirements contract to provide commercial services. The Contractor shall furnish all labor, equipment, materials, and services necessary to provide emergency response, excavation, remediation (including potential storage tank removal from site), groundwater well installation, groundwater monitoring, water sampling, and reporting services for contaminated or impacted soil/groundwater for the Bay Pines VA Healthcare System. This contract will be effective from July 15, 2018, through July 14, 2019, with 4 option years. There are two current sites within the BPVAHCS requiring remediation services. During construction of a new mental health addition located on the C.W Bill Young campus in 2013, four abandoned 30,000-gallon fiberglass underground storage tanks (USTs) containing diesel fuel, used for emergency generators, were removed from the BPVAHCS. During the removal process, it was not possible to remove the fiberglass tanks without destroying them, and this led to the mixing of diesel fuel-impacted soil with the groundwater. Although soil and groundwater remediation had begun at the location, construction activities prevented continued groundwater monitoring to meet FDEP Groundwater Cleanup Target Levels (GCTL). (Technical information on previous monitoring well locations and GCTLs results are available, on request, at the Safety and Emergency Management Office.) A second remediation site is located at the C.W. Bill Young campus, Building 40. This location requires soil and groundwater remediation due to a diesel fuel spill. Existing daily fuel tank within same building will be decommissioned. QUOTES MUST BE RECEIVED VIA EMAIL BY OR BEFORE 4:00 PM ET ON MONDAY, JULY 9, 2018.

WEB: FBO.gov Permalink at https://www.fbo.gov/spg/DOE/PAM/HO/SRS_MandO_Tech_Challenges/listing.html

NAICS: 562910. This notice is posted to advise interested parties that the Department of Energy's Savannah River Site (SRS) will be hosting an all-day Technical Workshop on July 12, 2018, in Augusta, GA. DOE-SRS will present information on technical challenges associated with management and operation of the Savannah River Site. This event will provide an opportunity to hear from subject matter experts on the current technical issues, needs, and challenges facing DOE-SRS. The workshop will be held at the Augusta Marriott at the Convention Center, 2 Tenth Street, Augusta, GA 30901. There is no charge to attend, but pre-registration via email is required and walk-ins will not be permitted. Registration is limited to three representatives from each company or group. Attendance at this event is voluntary, and the government will not reimburse any contractor for attendance-related expenses. REGISTRATION FOR THIS TECHNICAL WORKSHOP WILL CLOSE ON JULY 10, 2018. The meeting agenda (topics and speakers) is provided as an attachment to the FedBizOpps notice.

SUPPORT FOR POLICY DEVELOPMENT, SCIENTIFIC ANALYSIS (SRCSGT)

SOL: 68HE0D18Q0058

DUE: 071018

POC: Laconda Hart, Contract Specialist, hart.laconda@epa.gov.

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/EPA/OAM/CMD/68HE0D18Q0058/listing.html>

NAICS: 541620. The Environmental Protection Agency (EPA) is issuing this RFI as a means of conducting market research to identify qualified firms (both GSA Schedule contract holders and non-Schedule Contractors) having interest in and the resources to support this requirement. The Government intends to use the capability statement responses to this RFI for information and acquisition planning purposes. This request for information is for a potential requirement entitled "Support for Policy Development, Scientific Analysis and Technical Information Development, Communications Strategy Design, Education and Outreach Products, and Dissemination of Guidance on Indoor Environmental Quality Issues." This requirement provides contractual support services for EPA's Office of Radiation and Indoor Air (ORIA). ORIA's mission is to protect the public and the environment from the risks of radiation and indoor air pollution. The office coordinates across the Agency and with other federal, state, tribal, and non-governmental organizations to carry out its mission. ORIA develops criteria, standards, guidance, policies, and programs to limit unnecessary radiation exposure and control exposure to indoor air pollutants. The Contractor shall support the following ORIA activities: development of indoor air quality policy; analysis and information development; development and implementation of communications and marketing strategies; education and outreach product development and dissemination; facilitation and/or logistical arrangements for meetings, trainings, conferences, and workshops; and graphics design. The synopsis and draft statement of work are available only on FedConnect at

<https://www.fedconnect.net/FedConnect/?doc=68HE0D1800058&agency=EPA> [Note: It might be necessary to copy and paste the URL into your browser for direct access]. The anticipated period of performance is not determined at this time but could range from three to five years. The contractor may be required to perform work at various locations in the United States. The applicable NAICS code is 541620 (Environmental Consulting), size standard \$15M. This requirement is a follow-on to EPA Contract EP-D-14-001 with The Scientific Consulting Group Inc. No solicitation exists at this time. CAPABILITIES STATEMENTS MUST BE RECEIVED NO LATER THAN 4:30 PM ET ON JULY 10, 2018. Based on the responses to this market research, all or part of this requirement may be set aside for small businesses or procured through full and open competition, and multiple awards may be considered.

GEOCHEMICAL ANALYSES SERVICES (COMBINE)

SOL: 140G0218R0040

DU: 071118

POC: Donald Downey, 888-275-8747, downdowney@usgs.gov.

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/DOI/USGS/USGS/140G0218R0040/listing.html>

NAICS: 541380. THIS ACQUISITION IS SET ASIDE 100% FOR SMALL BUSINESS under NAICS code 541380. An IDIQ requirements contract is contemplated. The U.S. Department of the Interior, U.S. Geological Survey has a requirement for geochemical analysis services in accordance with the solicitation posted on FedConnect at

<https://www.fedconnect.net/FedConnect/?doc=140G0218R0040&agency=DOI> [Note: It might be necessary to copy and paste the URL into your browser for direct access]. The USGS Energy Resources Program (ERP) has a need for geochemical analyses to support research efforts and resource assessments. Projects are currently being conducted by geoscientists in the ERP requiring geochemical analyses on different types of source rocks and oil and petroleum reservoir rocks and oils. The need for a large quantity of analyses necessitates the use of a laboratory external to USGS capable of timely analysis of a large number of samples. These analyses will support research undertaken to further USGS understanding of the fundamental geologic processes responsible for the accumulation of major petroleum accumulations. The success of the research and the assessments supported by this research require not only high quality data but also analytical results that can be compared with historic analytical data that have been recorded in previous USGS scientific investigations. Services, non-personal, are required to provide all equipment, instrumentation, and materials (unless otherwise already provided herein) necessary to analyze geologic materials. The exact number of samples to be analyzed is unknown; approximately 1000 samples are anticipated to be submitted annually over a 5-year period (period of performance 08/01/2018 to 01/31/2024). See the performance-based work statement for the specific analytical services required. OFFERS MUST BE RECEIVED NO LATER THAN 1700 ET ON JULY 11, 2018.

NAICS: 562211. THIS ACQUISITION IS SET ASIDE FOR SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS CONCERNS under NAICS code 562211, size standard \$38.5M. The objective is to provide Hazardous Material/Hazardous Waste program support to Eielson Air Force Base and Joint Base Elmendorf-Richardson (JBER), including the JBER Pacific Air Forces Regional Support Center (PRSC). Support includes conducting facility operations for handling, processing, and storing waste; supplying equipment and containers; loading and transporting hazardous waste; conducting inspections of hazardous waste accumulation areas; training base personnel and other contractors on management, handling, and storage of hazardous waste; sample collection/analyses, spill response, and operating the Air Force software system "Enterprise Environmental, Safety and Occupational Health - Management Information System" (EESOH-MIS) to track waste streams, waste quantities, waste accumulation areas and process waste for disposal. The Contractor shall provide all labor, materials, equipment, and transportation to support the Eielson, JBER and the PRSC Hazardous Waste Programs in accordance with the Performance Work Statement. Specifically the contractor will operate the Hazardous Waste Centers (HWCs) to collect, manage, and dispose of hazardous waste, universal waste, other regulated waste, and recyclable materials. The HWCs are central accumulation areas. OFFERS MUST BE RECEIVED NO LATER THAN 2:00 PM ALASKA TIME ON JULY 12, 2018.

HEADQUARTERS MARINE CORPS ENVIRONMENTAL SUPPORT (SRCSGT)

SOL: M95494-18-022

DU: 071318

POC: Cynthia. A. Guthridge, cynthia.guthridge@usmc.mil, 703-604-4498; Jessica Harker, Jessica.harker@usmc.mil, 703-604-0085.

WEB: FBO.gov Permalink at <https://www.fbo.gov/notices/601326c957aa2d92c074babcf9194748>

NAICS: 541620. This sources sought is issued for informational purposes only. No solicitation is available at this time. The services described in this notice are currently performed under Task Order M00264-14-F-1146. This sources sought is issued to support the development of an acquisition strategy for the follow-on to this Task Order. Headquarters Marine Corps (HQMC) requires comprehensive technical information, document management, and outreach support for various environmental aspects and initiatives in support of the Camp Lejeune Historic Drinking Water (CLHDW) program. The Marine Corps' CLHDW program is in place to notify former residents and workers of

contaminated groundwater that affected certain drinking water wells supplying water to some Camp Lejeune drinking water systems. The program keeps the former residents and workers informed as new information arises, and it also supports research initiatives to determine whether or not exposure to these chemicals might have caused adverse health effects. Under this effort, Contractor support is needed to assist the Marine Corps in meeting these and other similar requirements. Call Center/Outreach support is needed via on-site personnel and off-site support and is described in more detail in the FedBizOpps attachment. In addition to the basic support required, there will also be the following "optional" tasks: Technical support and additional mailings and/or advertising affecting the CLHDW program and similar environmental exposure-related issues at other installations. These optional tasks may be exercised accordingly by the Contracting Officer if needed. The period of performance is expected to be for a one-year base period (includes a 15 day transition-in period) with up to four one-year option periods, if exercised. Performance is anticipated to begin March 2019. The NAICS code for this requirement is 541620 (Environmental Consulting Services), size standard \$15M. Responses are requested ONLY from the sources that can provide the required services under the NAICS code. CAPABILITIES STATEMENTS MUST BE RECEIVED VIA EMAIL NO LATER THAN 10:00 AM ET ON JULY 13, 2018.

NAICS: 562910 OR 321911. THIS REQUEST FOR QUOTE IS 100% SET-ASIDE FOR SMALL BUSINESS CONCERNS.

[NOTE: The NAICS code is given as 562910 at FedBizOpps and as 321911 in the attachments at FedConnect.] The National Park Service contemplates award of a firm-fixed-price contract as a result of this combined synopsis/solicitation. Contractor shall provide all necessary labor, tools, equipment, materials, supervision, and travel necessary to remove asbestos from Quarters #B96 in West Glacier, Montana. Contractor is to abate the asbestos-containing (ACM) roofing throughout the entire building. It is assumed based on the EPA random testing requirements that some of the roofing tar paper and asphalt shingles contain asbestos. 1) Contractor shall abate all 5950 square feet of the tar paper sub roofing and asphalt shingles. 2) Contractor shall properly dispose of all ACM outside of the park in accordance with EPA standards. 3) Contractor shall perform all air clearance testing required to ensure a hazard-free environment of occupants of the building. This testing shall be done on the interior of the building to ensure no ACM infiltrated the building. Period of Performance: 09/30/2018 to 10/20/2018. QUOTES MUST BE RECEIVED NO LATER THAN 4:00 PM MT ON JULY 10, 2018. NAICS: 562112. THIS ACQUISITION IS A 100% SMALL BUSINESS SET-ASIDE under NAICS code 562112, size standard \$38.5M. Watervliet Arsenal (WVA) is an industrial facility located in Watervliet, New York, that manufactures cannons and large caliber weapon systems. WVA stores and handles large quantities of petroleum oil products and hazardous chemicals during routine operations. The installation is located less than 500 feet from the Hudson River and has a stormsewer system that discharges to both the Hudson River and the Kromma Kill. WVA has a Fire Department (FD) located on the installation that provides initial response to spill scenarios. The FD's function is to attempt to contain the spill and prevent further migration of the product. The scope of this contract involves different levels of response to a petroleum or hazardous materials spill on an as-needed basis. Spills may occur and travel to any of several surface types and/or environmental receptors. These include but are not limited to concrete, asphalt, wood block flooring, stone, soil, storm sewer catch basins, the local waterways, etc. Spills may occur at any time of day or night. The contractor will remove and clean up the spilled material, absorbent material, other impacted materials, and clean all affected surfaces. The contractor is responsible for the final cleanup of the spilled material. This may include continued maintenance cleaning to completely remove all spilled material and clean affected surfaces. The contractor will be required to respond as soon as possible to all calls, but no later than two hours after receiving the request. In the event that a spill cannot be contained by the WVA FD, the contractor will be required to respond and augment WVA personnel and equipment. The contractor should anticipate large volumes of product or product that has reached an environmentally sensitive receptor, such as the local waterways. Response time to WVA must be as soon as possible, but no later than one hour after the initial phone call from WVA. The contractor will be required to provide an emergency response fee in the bid, to be charged if an emergency response is requested by WVA. OFFERS MUST BE RECEIVED NO LATER THAN 2:30 PM ET ON JULY 30, 2018.

NAICS: 541330. THIS ANNOUNCEMENT CONSTITUTES A REQUEST FOR SUBMITTAL OF SF330 PACKAGES AND IS OPEN ONLY TO SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESSES under NAICS code 541330. The proposed

services, which will be obtained by negotiated firm-fixed-price contracts, are for a variety of A/E services for environmental support projects primarily within the Great Lakes and Ohio River Division mission boundaries, which is nationwide. Projects outside the primary mission area of responsibility may be added at the Government's discretion upon agreement of the A/E firm. The A/E services required will support military and civil environmental programs for several federal agencies including but not limited to the Army, Army Reserves, National Guard, Air Force, Navy, Marine Corps, Defense Logistics Agency, other Defense Services, and other federal agencies. Projects will be awarded by individual task orders. The maximum cumulative contract value is \$9M. The contract period is for five years with no options. Studies, designs, and other A/E services under this contract are anticipated to range from approximately \$100,000 to \$1,000,000 per task order. The top ranked firm will be awarded the first contract, and the second ranked firm will be awarded the second. Firms must be capable of performing work on a wide variety of hazardous, toxic, and radiological (HTRW) sites and projects regulated under CERCLA and RCRA in addition to other environmental sites in a manner that complies with federal, state, and local regulations and laws, and within timeframes required. ALL SF330 PACKAGES MUST BE RECEIVED NO LATER THAN 2:00 PM ET ON WEDNESDAY, JULY 31, 2018.

NAICS: 562910. THIS ACQUISITION IS SET ASIDE 100% FOR SMALL BUSINESS CONCERNS under NAICS 562910, size standard \$20.5M. The National Park Service requires the services of a certified asbestos abatement company at the Mojave National Preserve (MNP). MNP plans to demolish seven buildings during 2018, but prior to their demolition the asbestos-containing materials (ACMs) in them must be removed, transported off site, and properly disposed of at a facility that is permitted to accept ACM. The demolition of the seven buildings will be performed under a separate contract after the ACM is removed. Three additional buildings not planned for demolition also need to have the ACM removed and disposed of. The ACM removal from these ten buildings will be the base of this contract. Asbestos removal and disposal from an additional 10 buildings not planned for demolition will be options within this contract. The Park plans to exercise all of the options if funds become available and will do it before the contracting deadline of July 19, 2018. All of the buildings in this project are vacant and will remain vacant during the project. OFFERS MUST BE RECEIVED NO LATER THAN 1700 ET ON AUGUST 2, 2018. The synopsis and other details of this procurement are available only on FedConnect at <https://www.fedconnect.net/FedConnect/?doc=140P8118R0031&agency=DOI> [Note: It might be necessary to copy and paste the URL into your browser for direct access]. A site visit is scheduled for Tuesday, July 17, 2018, at 10 AM PT. Please RSVP jim_read@nps.gov if planning to attend.

NAICS: 541380. THIS ACQUISITION WILL BE A 100% SMALL BUSINESS SET-ASIDE under NAICS code 541380, size standard \$15M. Red River Army Depot (RRAD) requires laboratory analytical services for chemical analysis of soils, sediments, sludge, ground waters, surface waters, and other materials required for identification, classification, quantification, and other environmental compliance purposes. Analysis includes TCLP RCRA metals; volatiles; semi-volatiles; TPH 1005; TNRC C6 TO C35 1006; soil VOC 5035A; flash point; ignitability; pH (solid); pH (liquid); PCBs; cyanide; BTEX; Enterococci; total coliform; E. Coli; and mercury. The prospective contractor shall furnish all labor, tools, equipment, and materials to provide Environmental Laboratory Testing Services to obtain technically valid and legally defensible environmental analytical data if and when requested by RRAD. All work shall be done in accordance with the terms and provisions. It is understood that no one lab will always be capable of performing all requested analyses. The contractor may subcontract analysis; however, subcontracted labs must meet quality and applicable certification requirements in the PWS. Contract duration will be one base year plus four 12-month option years. RELEASE OF THE SOLICITATION IS ANTICIPATED ON OR ABOUT JULY 3, 2018.

DESTRUCTION OF 15 ABANDONED WELLS AT YOSEMITE NATIONAL PARK (PRESOL)

SOL: 140P8518R0003

POC: Liset Gomez, Liset_Gomez@nps.gov.

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/DOI/NPS/APC-IS/140P8518R0003/listing.html>

NAICS: 238910. THIS ACQUISITION IS A TOTAL SMALL BUSINESS SET-ASIDE under NAICS code 238910, size standard \$15M. The National Park Service, Yosemite National Park, has a requirement for destruction of 15 abandoned wells located in El Portal, Foresta, Wawona, and the Crane Flat Districts. The work will consist of obtaining Mariposa County Environmental Health permits, applicable State permits, and performing underground utility location clearance prior to drilling any ground disturbing activities. The Contractor shall remove and properly dispose of all pumps, piping, conduits, screens, etc. associated with each well and other debris from the well casing. Some minimal site cleanup is required to remove old piping and miscellaneous equipment associated with each well site. The Contractor shall perform all well destruction activities in compliance with California State Well Standards Bulletins 74-81 and 74-90. Destruction of the wells is to be performed under the supervision and guidance of a licensed C57 well driller. The Contractor shall take ownership and responsibility for the removal and disposal of all existing equipment, debris, etc. from each site, and all associated spoilage produced from the destruction of all wells. This includes disassembling the system equipment and related components, sorting the different waste streams, and hauling all waste materials

off-site for proper disposal, or recycling if practical. Properly dispose of all non-hazardous materials at a licensed facility. Waste materials classified by the Contractor as hazardous must be manifested, transported, and disposed of at an approved hazardous waste facility. The anticipated period of performance is scheduled from September 3, 2018, and shall be completed 90 days after Notice to Proceed. RELEASE OF THE REQUEST FOR PROPOSAL IS ANTICIPATED ON OR AROUND JULY 10, 2018, on FedBizOpps or on FedConnect at <https://www.fedconnect.net/FedConnect/?doc=140P8518R0003&agency=DOI> [Note: It might be necessary to copy and paste the URL into your browser for direct access]. The RFP will close 30 days from the actual date of issuance. The Government intends to award a single fixed-price contract.

SAN PEDRO BFCUST THERMAL REMEDIATION (PRESOL)

SOL: SPE603-18-R-5X09

POC: Rhoji H. Fernandez, Rhoji.Fernandez@DLA.mil, 703-767-8555.

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/DLA/J3/DESC/SPE603-18-R-5X09/listing.html>

NAICS: 562910. THE PROPOSED SOLICITATION WILL BE A FULL AND OPEN COMPETITION under NAICS code 562910. The Defense Logistics Agency (DLA) - Energy anticipates issuing an RFP within the next 60-90 days. The requirements are for non-personal services to include implementing interim remedial actions to support ongoing remediation efforts at Defense Fuel Support Point (DFSP) San Pedro, CA. The contractor shall implement (but is not limited to) two different technologies, with steam injection at two Bulk Field-Constructed Underground Storage Tanks (BFCUST, 4 and 15), and electro-resistive heating at five BFCUSTs (1, 5, 7, 11, and 12) at DFSP San Pedro. The services require the contractor to implement all activities within the framework of ongoing remediation efforts to include coordination with the incumbent contractor under DLA environmental services contract (currently DLA Contract SP0600-14-D-5411). The contractor shall provide materials, labor, and services to perform remediation of soil and groundwater using in situ thermal treatment technologies in accordance with applicable regulations. The contractor shall implement all elements of remedial action, including installing a preliminary set of treatment wells and monitoring points, observing and providing operational data and information collected to update the conceptual system model, and then implementing the full-scale design using data collected during the preliminary installation. The contractor shall perform modeling to design and construct systems, define limits of treatment areas, and prepare remedial action completion reports. Natural gas and electric service will be available at or near each BFCUST. It will be the Contractor's responsibility to connect to these energy sources and to provide all necessary equipment (meters, piping, transmission lines, etc.) to operate the requisite treatment equipment. Furthermore, the amount of natural gas and electric power available at the site may be limited. Sequential rather than concurrent operations of some systems may be required. Contractor shall ensure activities scheduled, coordinated, and conducted in accordance with DLA and Navy Weapons Station Seal Beach policy and protocols (e.g., environmental, safety, and public affairs). The contractor shall be responsible for determining and obtaining all requisite permits (including payment of associated fees) for operation of their remediation equipment. A single award of one 30-month base period with a 6-month option is expected for this requirement. An RFP will be issued in the near future under solicitation SPE603-18-R-5X09. A pre-proposal conference will be conducted at DFSP San Pedro by DLA Energy on a date to be determined; notice of this conference will be posted on FedBizOpps.

NAICS: 562910. THIS REQUIREMENT WILL BE SOLICITED AS A COMPETITIVE 100% SMALL BUSINESS SET-ASIDE under NAICS code 562910 (EXCEPTION 2) size standard 750 employees. Any resulting acquisition will be a single-award Requirements Contract. Eglin AFB, Florida, has a future requirement for Emergency Response Services. This announcement is only a presolicitation notice; a written solicitation will be issued at a later date [unspecified in this notice]. In general, the work will encompass routine and timely response to emergency situations requiring environmental spill response and remediation services. The period of performance is one base year with four option years. The work is located at Eglin AFB, FL, Eglin's surrounding ranges, and a 5-state area (Florida, Georgia, Alabama, Mississippi, and Louisiana). This is a paperless acquisition; paper copies of the solicitation will not be issued. The RFP will be posted on FedBizOpps.
