## LEAD ABATEMENT FPS PISTOL RANGE (COMBINE)

**SOL:** 47PK1318R0006

**DUE:** 081518

**POC:** Suzanne Paulette, Program Analyst, [suzanne.paulette@gsa.gov](mailto:suzanne.paulette@gsa.gov), 415-844-3061; Amanda Sweeney, deputy Director, SFSC, [amanda.sweeney@gsa.gov](mailto:amanda.sweeney@gsa.gov), 415-522-3315.

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/GSA/PBS/9PEC/47PK1318R0006/listing.html>

**NAICS:** 562910. THIS REQUIREMENT IS A SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS SET-ASIDE under NAICS code 562910. The government-owned building located at 630 Sansome Street, San Francisco, Calif., recently decommissioned a firing range in the basement of a 21-story office building. The building was constructed in 1944 and is approximately 500,000 GSF. Located in the financial district, the building is connected to another federal building located at 555 Battery Street. The decommissioned firing range was used by federal law enforcement personnel. The contractor shall provide all necessary material, labor, equipment and supervision to abate lead and asbestos in the existing firing range, storage rooms, hallway, and mechanical room in accordance with the statement of work. The specific dates for period of performance will be determined after contract award, but all work should be completed by December 30, 2018. PROPOSALS MUST BE RECEIVED NO LATER THAN 2:00 PM PT ON AUGUST 15, 2018.

## REPAIR PERCHLORIC ACID FUMEHOOD WASHDOWN SYSTEM (SRCSGT)

**SOL:** NB193000-18-03209

**DUE:** 081618

**POC:** Gina Lee, Contract Specialist, [gina.lee@nist.gov](mailto:gina.lee@nist.gov), 301-975-8334.

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/DOC/NIST/AcAsD/NB193000-18-03209/listing.html>

**NAICS:** 562910. This notice is a Sources Sought issued solely for Market Research Purposes to investigate the interest and capability for the work of the range of small business entities. Based on capability statements received in response to this notice, this acquisition maybe solicited as a 100% small business set-aside. All small business organizations (SB, SDB, WOSB, HUBZone, and VOSB and SDVOSB) are encouraged to respond to this notice. The National Institute of Standards and Technology (NIST) in Gaithersburg, MD, has four perchloric acid hoods, each with separate exhaust duct, exhaust fan, and water washdown system. The washdown systems are required by the National Fire Protection Association (NFPA) to alleviate the hazard of explosive perchlorates forming in the ductwork or fumehood. Several washdown nozzle failures have limited the occupants' ability to work with perchloric until the system can be repaired. Several areas of the washdown system were not performing properly and needed to have components repaired/replaced. The Contractor shall have a certified industrial hygienist (certified by the American Board of Industrial Hygiene) test the duct washdown effluent for perchlorates in accordance with NFPA 45-2015, A.7.12.10 and MD 15129-2006, "Guidelines for Perchloric Acid Fume Hoods and Their Exhaust Systems." 5.2.2. Interested and capable vendors are invited to submit a capability statement (5 pages max) via email to the POC. RESPONSES MUST BE RECEIVED NO LATER THAN 5:00 PM ET ON AUGUST 16, 2018.

## SLUDGE REMOVAL (SRCSGT)

**SOL:** FA4407-18-Q-3024

**DUE:** 081718

**POC:** Brian J. Morelock, Contract Specialist, [brian.morelock@us.af.mil](mailto:brian.morelock@us.af.mil), 618-256-9262.

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/USAF/AMC/375CS/FA4407-18-Q-3024/listing.html>

**NAICS:** 562991. This acquisition is being considered for Small Business Socio-Economic contracting programs (i.e., Service-Disabled Veteran-Owned Small Business (SDVOSB), HUBZone, 8(a), Woman-Owned Small Business (WOSB), and Small Business) as a set-aside. Interested firms are invited to provide the information requested in the FedBizOpps notice. This sources sought is a request for information only; it is NOT a request for proposals. The U.S. Air Force, 375 Contracting Squadron, Scott Air Force Base, IL, is seeking sources to remove sludge in accordance with the Illinois Environmental Protection Agency (IEPA). The NAICS code is 562991 (Septic Tank and Related Services), size standard \$7.5M. The anticipated Period of Performance is 01 Oct 2018 - 30 Sep 2019. Contractor shall be fully accredited to remove sludge in accordance with the IEPA. Contractor shall provide all labor, equipment, material, and transportation required to remove treated sludge from the wastewater treatment plant at Scott AFB, IL. Sludge removal shall be required up to four times per year, disposing an estimated total of 600,000 gallons of anaerobically digested liquid sludge. The actual amount available for removal could be significantly less or more. Liquid sludge shall be removed from both or either of two digesters located at the Scott AFB Wastewater Treatment Plant. Disposal methods shall be land application, and the contractor shall conform to all federal EPA and IEPA rules and regulations, including 40 CFR 503. 375 Contracting Squadron is anticipating a firm-fixed-price contract. RESPONSES MUST BE RECEIVED NO LATER THAN 2:30 PM CT ON AUGUST 17, 2018.

#### **MERCURY REMEDIATION SERVICES (COMBINE)**

**SOL:** NAAJA000-18-00198

**DUE:** 082218

**POC:** Jennifer Burns, Contract Specialist, [Jennifer.Burns@noaa.gov](mailto:Jennifer.Burns@noaa.gov), 301-628-0026.

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/DOC/NOAA/NESMD/NAAJA000-18-00198/listing.html>

**NAICS:** 562910. THIS REQUIREMENT WILL BE SOLICITED AS A 100% SMALL BUSINESS SET-ASIDE under NAICS code 562910. The National Oceanic and Atmospheric Administration (NOAA), National Weather Service (NWS) requires the remediation and industrial hygiene oversight/clearance air testing for mercury remediation work for the former NWS Barometric Pressure Standards Laboratory (PSL). The area in question is approximately 750 square feet and is located in rooms 2378B and 2384 and the adjoining hallway, 1325 East West Highway, Silver Spring, MD. The area shall be cleaned with appropriate mercury decontamination materials, equipment, and procedures. Guidance from a third-party industrial hygiene firm will be followed with regard to areas that require additional cleaning. This is a firm-fixed-price purchase order for the described services. Performance shall occur within 60 days from the date of award. It is expected that the remediation and air testing shall take no longer than 4 days to complete. A site visit is not required prior to submitting a response to this RFQ. ALL QUOTES AND REVISIONS MUST BE RECEIVED BEFORE 3:00 PM ET ON WEDNESDAY, AUGUST 22, 2018, via email to [Jennifer.Burns@noaa.gov](mailto:Jennifer.Burns@noaa.gov).

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/USA/COE/DACA01/W91278-18-L-0024/listing.html>

**NAICS:** 541330. The purpose of this notice is to gain knowledge of potential qualified Small Business, HUBZone, 8(a), service-disabled veteran-owned, and woman-owned small business firms, specifically firms under NAICS code 541330, small business size standard \$15M. Responses to this notice will be used by the government in making appropriate acquisition decisions. The U.S. Army Corps of Engineers (USACE), Mobile District, anticipates a future IDIQ procurement to acquire Architect-Engineer (A-E) Services (FAR Part 16) under individual task orders in support of the Mobile District's Environmental Quality Program, specifically complex environmental compliance and pollution prevention projects. The majority of the work for the military-related environmental services will be on military/federal installations throughout the world, including the Continental United States, its territories, South and Central America, and other world nations. The majority of the work for the civil works-related environmental services will be in the

southeastern United States (Alabama, Florida, Georgia, and Mississippi) as well as Central and South America. Required AE environmental services supporting the Environmental Quality Program, include but are not limited to all products and studies associated with complex environmental compliance and pollution prevention projects, to include strategy development, plans, data gathering, analysis, evaluations, studies, designs and permitting action support for Mobile District's military, civil works, and support for others customers. The selected firm must have, either in-house or through consultants, the following disciplines, with professional registration required where applicable: (1) Project Manager; (2) Environmental Engineer (PE); (3) Chemist; (4) Geologist (PG); (5) Biologist; (6) Certified Industrial Hygienist (Certified/ Registered); (7) Chemical Engineer (PE); (8) Certified Energy Manager (Certified/ Registered); (9) Civil Engineer; (10) Air Quality Specialist; (11) Clean Water Act Specialist; (12) RCRA Specialist; and (13) GIS Specialist. Qualified firms are invited to submit brief statements of capability (8 pages max). ALL RESPONSES MUST BE RECEIVED VIA EMAIL NO LATER THAN 12:00 NOON CT ON AUGUST 22, 2018, to [Penny.E.Lett@usace.army.mil](mailto:Penny.E.Lett@usace.army.mil) & [Janis.R.Steiner@usace.army.mil](mailto:Janis.R.Steiner@usace.army.mil). **NAICS:** 562910. The U.S. Department of Energy's Office of Environmental Management Consolidated Business Center (EMCBC) is currently in the acquisition planning phase for a potential upcoming procurement to perform DD&R of Facilities, Waste Management, and Program Support for the National Nuclear Security Administration (NNSA), the Office of Environmental Management (EM), and the Office of Science (OS). The services to be acquired may be performed at various locations throughout the United States, including but not limited to Lawrence Livermore National Lab (LLNL) and Brookhaven National Lab (BNL). This request for information is being issued to solicit input via capability statements from interested parties with the specialized capabilities necessary to meet all or part of the major elements of scope for the upcoming competitive procurement(s) for the Nationwide DD&R requirements. DOE is seeking to determine whether or not the full requirements or part of the requirements can be set-aside for small businesses, 8(a) small businesses, small disadvantaged businesses, economically disadvantaged woman-owned small businesses, woman-owned small businesses, HUBZone small businesses, veteran-owned small businesses, or service-disabled veteran-owned small businesses under NAICS code 562910 (Environmental Remediation Services), size standard 750 employees. All interested parties are invited to submit a capability statement of no more than 15 pages. DOE is also seeking feedback from contractors and other interested parties regarding options for innovative approaches for the performance of the major elements of scope as well as insight into potential contracting alternatives. This market research will assist DOE with identifying interested and capable sources and developing its acquisition strategy. Key market research goals include identifying and minimizing barriers to competition, evaluating small business capabilities, identifying risks, identifying potential requirements definition and contract alternatives, and identifying appropriate terms and conditions. Due to the preliminary stage of this planning activity, no Performance Work Statement is available at this time. DOE EMCBC has created a procurement website at <https://www.emcbc.doe.gov/seb/nationwideddr/> where additional information will be provided and updated as it becomes available. For updates, interested parties should monitor the EMCBC website and FedConnect at <https://www.fedconnect.net/FedConnect/?doc=89303318NEM000003&agency=DOE> [Note: It might be necessary to copy and paste the URL into your browser for direct access]. See the "Major Elements of Scope" attachment at FedConnect for additional details. ALL CAPABILITY STATEMENTS AND QUESTIONS PERTAINING TO THIS ANNOUNCEMENT SHALL BE SUBMITTED ELECTRONICALLY TO [nationwideddr@emcbc.doe.gov](mailto:nationwideddr@emcbc.doe.gov) NO LATER THAN 5:00 PM ET ON AUGUST 30, 2018.

**NAICS:** 562112. THIS ACQUISITION IS UNRESTRICTED. The Bureau of Land Management Roswell Field Office is seeking a contractor to remove and dispose of the waste material from the Inexco #6 well site in Chavez County, NM. Removal and disposal of the waste material may be concurrent with waste characterization (RCRA Subtitle C exempt or non-exempt waste). Services requested include waste removal, transportation of material to the disposal facility, and final report. The contractor will have the experience and technical ability to carry out site characterization, site analysis, soil sampling, soil sample analysis, and waste removal. The period of performance will begin October 1, 2018, or date of award, whichever is later, and will end October 31, 2018, or the date of completion of all contract requirements, whichever is earlier. A pre-bid site tour is scheduled for August 29, 2018. OFFERS MUST BE RECEIVED VIA EMAIL NO LATER THAN 5:00 PM ET ON SEPTEMBER 11, 2018. The synopsis, maps, statement of work, and all other details concerning this procurement are available only on FedConnect at <https://www.fedconnect.net/FedConnect/?doc=140L3018Q0023&agency=DOI> [Note: It might be necessary to copy and paste the URL into your browser for direct access].

**NAICS:** 541620. THIS FORTHCOMING REQUIREMENT WILL BE ISSUED AS A SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS (SDVOSB) SET-ASIDE under NAICS code 541620, size standard \$15M. Contractor shall conduct a comprehensive survey of the Cheyenne Veterans Affairs Medical Center, 2360 E Pershing Blvd, Cheyenne, WY 82009 for the presence of friable asbestos-containing materials (ACM). ACM is intended to mean all materials that would fall under either the EPA Asbestos Hazard Emergency Response Act (AHERA) regulations or the OSHA asbestos standards. It shall be the contractor's responsibility to identify the applicable federal, state, local laws and regulations, and Veterans Health Administration (VHA) Directives, and apply the procedures and protocols as required. The survey will include accessible areas of all site buildings and, if present, suspect materials on the exterior of buildings and in tunnels and crawl spaces. Contractor will provide a complete update to prior baseline asbestos assessment surveys to ensure compliance with EPA, AHERA, and OSHA asbestos notification requirements to building occupants. The project construction magnitude is between \$250,000 and \$500,000. RELEASE OF THE RFP IS ANTICIPATED ON OR AFTER AUGUST 8, 2018.

**NAICS:** 562211. DLA ACQUISITION ANTICIPATES RELEASING A REQUEST FOR PROPOSALS ON OR ABOUT SEPTEMBER 24, 2018, for a contract that covers non-personal services for inspection, packaging/repackaging, loading, unloading, containerization, removal, transportation, storage, recycling, reuse, recovery, treatment, export, and disposal of hazardous and regulated substances from U.S. Military Installations on the continent of Africa. Locations throughout Africa will be specified in the solicitation. Additional services include expedited removals, waste management and receiving services, laboratory analysis, preparation of DD Form 1348-1, sampling and analysis for each waste stream, reports and forms, tank cleaning, labels, and repackaging services. Infectious, controlled, and radioactive wastes, or mixtures of such wastes with hazardous waste, shall not be included under this contract. Waste disposed of under this contract may possibly be contaminated with one or more substances not specifically identified. The removal, transportation, storage, treatment, and disposal of wastes offered under this contract is to be performed in accordance with international environmental, safety and health laws and regulations; international agreements governing the generation, storage, transportation and disposal/recycling of dangerous goods; and in conformance with industry standards that minimize risks to human health and the environment. These standards apply not only to the country in which the waste is generated, treated, and disposed of, but also any transit countries through which the waste is transported. The contractor shall comply with any changes or new requirements identified by the above-regulating bodies that they might promulgate during the performance of the contract. Interested offerors are advised to monitor this site frequently, as the solicitation will be issued as soon as possible. The solicitation will result in an IDIQ-type contract, with award to a single firm. The resultant contract will have one 30-month base period, one 30-month option period, and an option to extend services for up to an additional six months. Performance under the resultant contract will be requested via issuance of written task orders. Selection of a firm for contract award is expected to be based on a combination of technical, price, and past performance.

#### **RAYMARK REMEDIATION SERVICES IDIQ (PRESOL)**

**SOL:** W912WJ18R0003

**POC:** Erin E. Bradley, Lead Contract Specialist, [erin.e.bradley@usace.army.mil](mailto:erin.e.bradley@usace.army.mil), 978-318-8195.

**WEB:** FBO.gov Permalink at <https://www.fbo.gov/spg/USA/COE/DACA33/W912WJ18R0003/listing.html>

**NAICS:** 562910. THIS FORTHCOMING PROCUREMENT WILL BE A SMALL BUSINESS SET-ASIDE, Best Value Trade-off award under NAICS code 562910 (size standard 750 employees). The U.S. Army Corps of Engineers, New England District intends to issue a Request for Proposal for a single-award IDIQ remediation services task-order contract for Operable Units (OUs) 3, 4, and 6 of the Raymark Superfund Site in Stratford, Connecticut. Raymark generated wastes containing asbestos, lead, copper, PCBs, and a variety of solvents, adhesives, and resins as byproducts of its manufacturing operations. U.S. EPA recently approved one Record of Decision (ROD) that specified the selected remedies for OUs 3 (Upper Ferry Creek), 4 (Raybestos Memorial Ballfield), and 6 (Additional Properties) of the Raymark Superfund Project. Excavated Raymark waste-contaminated soil from OUs 3 & 6 will be consolidated at the OU4 Memorial Ballfield and covered with a low-permeability cap, except for the sediment and waste soil containing more heavily contaminated material that exceeds certain regulatory limits, which will be transported to a licensed out-of-town disposal facility. Based on available data, EPA estimates that about 10% of the estimated 110,000 cubic yards of sediment and Raymark Waste to be excavated from OU3 and OU6 might exceed the regulatory Principal Hazardous Constituents (PHC) limits. Because treatment to levels suitable for on-site reuse is not viable or practicable due to the numerous and diverse nature of the contaminants found in Raymark waste, the Selected Remedy addresses this PHC waste by excavation and disposal at an out-of-town licensed disposal facility. Also, any Raymark Waste that exceeds the contamination threshold at OU4 will be transported to an out-of-town licensed disposal facility (currently estimated at about 10,000-25,000 cubic yards). No solicitation is available at this time. Release of the solicitation requirements and contract documents, including instructions for submission and the response date, IS ANTICIPATED AROUND SEPTEMBER 2018 ON FEDBIZOPPS. No additional information will be available until the solicitation is released.

**NAICS:** 562910. THE U.S. DEPARTMENT OF ENERGY INTENDS TO ISSUE A SOLICITATION IN ELECTRONIC FORMAT ON OR ABOUT AUGUST 20, 2018. The required services include environmental consulting and remediation for planning and conducting characterization, deactivation, demolition, remediation, recycling, and waste disposition. This procurement will be a TOTAL SMALL BUSINESS SET-ASIDE under NAICS code 562910 (Environmental Remediation Services), size standard 750 employees. DOE anticipates awarding one or more IDIQ contracts from the solicitation. Place of Performance: Oak Ridge, Tennessee. The Y-12 National Security Complex, Oak Ridge National Laboratory, and East Tennessee Technology Park include numerous facilities, soils, concrete slabs, containerized and non-containerized debris, and aging legacy waste populations that require investigation and additional characterization in order to determine appropriate disposal options. Following completion of characterization activities, the Contractor may be requested to perform deactivation and demolition of facilities, or site remediation. In these cases, the Contractor shall be responsible for the removal, recycling, and/or disposition of facilities, structures, and primary and secondary waste generated as a result. All support requirements shall be in accordance with the Federal Facilities Agreement (FFA), found at [http://www.ucor.com/ettp\\_ffa.html](http://www.ucor.com/ettp_ffa.html). The estimated maximum value is \$24.9M for a period of performance of five years from the date of contract award. A Pre-proposal conference is planned. The date, times, and location will be posted in the final solicitation and as well as on the DOE Environmental Management procurement website at <https://www.emcbc.doe.gov/SEB/OREMCDDRS/>. The full presolicitation synopsis is available only on FedConnect at <https://www.fedconnect.net/FedConnect/?doc=89303518REM000003&agency=DOE> [Note: It might be necessary to copy and paste the URL into your browser for direct access].

**NAICS:** 562910. Grafenwoehr Training Area is an active live fire and maneuver training center. Training area Grafenwoehr has been used for over 70 years for military purposes by the U.S. During this timeframe, unexploded ordnance and damaged hard metal targetry have resulted. The metal targetry consists of following types of vehicles: e.g., the old Jeep model, pickup trucks, trailers, recovery tanks, tank hulls from M41, 42, 48, Bundeswehr Kanonenjagdpanzer, troop transporters and several other types of vehicles. The Contractor shall provide non-personal services to conduct training land reactivation. The Contractor shall dispose of app. 520 tons of old metal targets, such as tanks, military vehicles, partly burrowed [buried?] or filled with soil and remains of ammunition and ammunition parts. This type of material is potentially contaminated with unexploded ordnance and should be screened prior to disposal. Necessary tree cutting up to 15 cm stump diameter, and transportation of collected scrap to the weight station. The service to be accomplished under this contract will be performed at the Training Area Grafenwoehr located between the towns Nuernberg and Weiden app. 70 km north-east of Nuernberg, Federal Republic of Germany. Work must be accomplished on following areas within the Grafenwoehr Training Area: Range 118, 124, Demo 1 Area, EOD Demo Area, South Camp Vilseck, PA-257, 201, 201C, 203, 211, 301, 302, 305, 310, 311, and several other locations. The period of performance shall be for one year of 12 months under a firm-fixed-price contract. This will be a non-personal services contract to provide training land reactivation. The Government shall not exercise supervision or control over the contract service providers performing the services herein. Such contract service providers shall be accountable solely to the Contractor who, in turn is responsible to the Government. The Contractor shall deliver the required ammunition to blow unsecure unexploded ordnance in coordination with the 7ATC Safety Office. The Contractor will provide all machinery such as containers, cutting devices, excavators, bulldozers, trucks, cranes, and fuel for such equipment to meet the requirements under the Performance Work Statement. [The announcement did not provide an anticipated solicitation release date.]

**NAICS:** 562910. The U.S. Army Corps of Engineers - Omaha District, intends to issue a firm-fixed-price modification to URS Group, Inc., on a Sole Source basis, for the following services: Provide all personnel, equipment, supplies, facilities, transportation, tools, materials, supervision, and other items and non-personal services necessary to perform Feasibility Study/Proposed Plan/Record of Decision for the Hill AFB Utah Test and Training Range Military Munitions Response Program sites TG507, OD508b, TG509a, TG511b, OD513b, and XU512b. The current contractor has a team in place that has completed the remedial investigation on the above sites with the necessary personnel, expertise, and safety protocols to contend with the remote and austere conditions while conducting remediation activities. The current archaeologists developed the approved cultural resources approach, and understand both the prehistoric and historic context of the area. The current contractor is deployed to this remote location, has established essential communications, and obtained the security clearances required for access to the UTTR. Their personnel have completed all requisite training and possess current approvals required to access the sites. A SOLICITATION WILL NOT BE POSTED.

**NAICS:** 562910. U.S. DOE's Office of Environmental Management, Portsmouth/Paducah Project Office intends to negotiate a sole-source (up to) six month extension from October 1, 2018, to March 31, 2019, and intends to issue a modification under the Portsmouth Engineering Technical Support II (ETS II) contract with RSI EnTech LLC, Contract No. DE-EM0002639, by means of other than full and open competition. The anticipated award date of this contract extension is on or before September 30, 2018. RSI possesses the necessary approved programs, policies, procedures, and certified personnel for performing the oversight required by this contract. Should all six months be required, the estimated dollar value of this contract action is between \$5 and \$6 million.

**NAICS:** 541380. The U.S. Fish and Wildlife Service (USFWS), Contracting and General Services in Falls Church, VA, intends to award to University of Wisconsin System, 465 Henry Mall, Madison, WI 53706, for the National Atmospheric Deposition Program, which is a cooperative monitoring program that measures, assesses, and reports on the exposure of natural and cultural resources to atmospheric chemical deposition throughout North America. Support for this cooperative program comes from federal, state, and local government agencies; Native American organizations; State Agricultural Experiment Stations (SAES); universities; and non-governmental organizations. Data from NADP is used to facilitate cleaner water, healthier air quality, more productive fisheries, smarter environmental planning, improved air quality forecasting, stronger roads and buildings and responsible environmental stewardship. The Program Office, located at the Wisconsin State Laboratory of Hygiene on the University of Wisconsin-Madison campus, coordinates the six nationwide NADP networks, including the new Litterfall network. The proposed contract is for services for which the Government intends to solicit and negotiate with only one source under the authority of FAR 13.106-1(b).
