RTP ON-SITE RESEARCH LABORATORY SUPPORT (SRCSGT)

SOL: 68HERC19R0061

DUE: 071119

WEB: FBO.gov Permalink at <https://www.fbo.gov/spg/EPA/OAM/OH/68HERC19R0061/listing.html>

NAICS: 541715. U.S. EPA is performing market research to evaluate the interest and capabilities of large and small businesses in preparation for a future procurement under NAICS code 541715 [Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology)], size standard 1,000 employees. Small businesses are particularly encouraged to participate in this Sources Sought process. EPA's Office of Research and Development has a continuing requirement to obtain research laboratory support services at its facility (primary location) in Research Triangle Park, NC, as well as various remote locations. Support to be provided includes facility scheduling, daily on-site and off-site operations, research activities, and modification and maintenance of facilities. Specific demonstrated capabilities to be addressed in responses to this notice include the following: (1) General project requirements, including project management; QA/QC activities for laboratory operations; occupational safety, health, and environmental management; management and response to facility trouble calls; presentation of conducted research at technical conferences, seminars, etc.; collaboration with colleges, universities, and other outside groups; computer support services; and report preparation. (2) Laboratory research, including evaluating the feasibility of

potential control technologies and/or developing data regarding pollution control and or/prevention devices, as well as conducting laboratory studies to investigate technologies for the decontamination, disposal, and/or sampling and analyses of materials contaminated with surrogates of biological, chemical, radiological, or foreign animal disease agents. (3) Facility operation, including designing, assembling, maintaining, repairing, and modifying laboratory pilot plants, test facilities, and full-scale scientific research equipment. (4) Process sampling and monitoring, including acquiring and using laboratory samples and related equipment for laboratory, pilot, and full-scale processes. (5) Analytical chemistry and microbiology, including sample preparation, inorganic analysis, organic analysis, physical analysis, and microbiological analysis. (6) Instrumentation and electronics, including the development, modification, fabrication, calibration, repair, design, and maintenance of instrumentation and electronics (e.g., laboratory instruments, computer interfaces, sampling equipment, machine and fabrication shop processes). (7) Off-site research, including remote location research in areas such as diesel emissions, automobile emissions, residential wood combustion, ventilation and air cleaning, decontamination and disposal, relationship between indoor and outdoor fine particles, etc. (8) Technical support to pilot-scale and field studies, including conducting field evaluations for various types of pollutants; operating and maintaining a field evaluation facility for both short and long durations; developing and executing research plans; conducting and supporting regional exposure studies; designing, validating, and implementing time-activity measurement methods; and providing Institutional Review Board approval for research involving human subjects. An IDIQ-type contract is anticipated, with individual task orders issued on either a firm-fixed-price or time-and-materials basis. The expected contract start date is April 1, 2020, for a duration of a single 5-year ordering period. Interested firms are invited to submit a capabilities statement that demonstrates the firm's ability to perform the key requirements described. RESPONSES MUST BE RECEIVED VIA EMAIL NO LATER THAN 5:00 PM ET ON THURSDAY, JULY 11, 2019.
