Federal Contract Opportunities Update

Notices for November 17-22, 2026

This update contains summaries of procurement notices issued between November 17-22, 2026 that pertain to hazardous waste, investigation and cleanup of environmental contamination, and related environmental topics. However, it does not necessarily contain EVERY notice on these topics.

If you would like to search for additional current and archived notices, or receive notification of solicitation amendments, please visit the FedBizOpps web site.

F -- WYCKOFF/EAGLE HARBOR SUPERFUND SITE, REMEDIAL ACTION (SNOTE)
SOL: 68HE0727R0001
DUE: January 5, 2027
NAICS: 562910. THIS SPECIAL NOTICE IS A REQUEST FOR INFORMATION. The U.S. Environmental Protection Agency (EPA) is seeking industry feedback on draft requirements for the Wyckoff/Eagle Harbor Superfund Site remedial action to help refine the performance-based requirements and inform the procurement strategy. EPA invites interested firms to review the attached draft Performance Work Statement (PWS), design documents, drawings, specifications, and price schedule and submit comments, recommended revisions, and responses to the attached industry questions. Feedback should address document clarity and consistency, technical and design details, pricing structure, constructability, schedule, performance risks, and potential barriers to competition. EPA may use industry input to refine or clarify the requirements but is under no obligation to incorporate proposed changes. All documents and requirements are preliminary and subject to revision before issuance of a formal solicitation. This notice is for market research purposes only and does not constitute a solicitation or commitment by the Government. Responses are voluntary, and the Government will not reimburse any costs incurred in preparing a response. RESPONSES ARE DUE BY 4:30 PM EST ON JANUARY 5, 2027.

Y -- CONSTRUCT INTERIM REMEDIAL ACTION (IRA) FOR THE NELSON TUNNEL SUPERFUND SITE (SOL)
SOL: W9128F27RA063
DUE: January 6, 2027
NAICS: 237990. THIS IS A FULL AND OPEN COMPETITION. The U.S. Army Corps of Engineers (USACE), Omaha District, is seeking a contractor to implement an Interim Remedial Action (IRA) at the Nelson Tunnel Superfund Site in the San Juan Mountains near Creede, Colorado. The project involves an abandoned underground hard rock mine and drainage tunnel, including multiple shafts, crosscuts, and drifts branching from the main tunnel. The primary objective of the IRA is to reduce the risk of a large, uncontrolled release of mine-impacted water from pools impounded within the Nelson Tunnel. The selected remedy, Alternative 4, as identified in the Interim Record of Decision (IROD), includes

constructing a new bypass adit to connect to the Nelson Tunnel, rehabilitating the existing tunnel, and installing flow-control structures. Specific remedial components include construction of a new adit south of the Nelson Tunnel to bypass the Nelson Tunnel Portal Pool; rehabilitation of the Nelson Tunnel from the bypass adit connection to the planned bulkhead location; installation of a flow-through hydraulic bulkhead in the Nelson Tunnel to prevent a sudden, uncontrolled release of mine-impacted water; and installation of an accessible flow-control bulkhead structure in the Commodore 5 level to prevent a sudden, uncontrolled release through that level. The contract will be awarded using a Best Value Tradeoff approach in accordance with Federal Acquisition Regulation (FAR) Part 15 procedures. OFFERS ARE DUE BY 1:00 PM CST ON JANUARY 6, 2027.
