

ITRC Internet-Based Training Course Questions Wiki

Main

Welcome to the ITRC Internet-Based Training Course Questions Wiki.

During ITRC Internet-Based Training class, participants have the opportunity to submit questions online. During the live class, we address as many questions as possible. For remaining unanswered questions, these webpages provide the list of questions and answers.

Beginning in June 2010, questions and answers will be added to these pages. Over time, more topics will be included in the training pages.

Available topics:

Attenuation Processes for Metals and Rads

Biochemical Reactors for Treating Mining Influenced Water

Biofuels

Contaminated Sediment Bioavailability

Contaminated Sediment Remediation

Environmental Molecular Diagnostics

Geophysical Classification for Munitions Response

Groundwater Statistics

Green & Sustainable Remediation (GSR)

In Situ Bioremediation

Incremental Sampling Methodology

Integrated DNAPL Site Strategy

LNAPLs

Mass Flux and Mass Discharge

Mining Waste

Passive Samplers

Phytotechnologies

PRB Update

Petroleum Vapor Intrusion

Risk-2

Risk-3

Solidification Stabilization
