

**Jim Cummings** has over 25 years of experience in supporting the development, evaluation and deployment of innovative hazardous waste treatment technologies. He was involved in setting up the Superfund innovative Technology Evaluation (S.I.T.E.) program and co-managed numerous SITE program demonstrations. He has given many presentations and served on the Advisory Boards of the Battelle, RemTEC and AEHS Conferences. He provides technical support to federal and state RPMs working on CVOC sites and wood treaters/former MGPs with PAH contamination. Particular areas of interest include In Situ Thermal Treatment and Combined Remedies.
