

#### The Council of State Governments

Preparing states for tomorrow, today

Legislative Efforts Aimed at Reducing Waste Tires Piles Along the U.S. – Mexico Border Region

#### **BLC Efforts**

- Topic of tires has been ongoing issue of interest among legislators of the border states
- Concern over health and safety as a result of tire piles along the border, as well as nuisance tire piles have on border communities;
- Legislators adopted recommendations and continue to seek legislative solutions aimed at better managing waste tires

## Adopted Recommendations

- Promote the development of harmonized set of management or regulatory frameworks on the quantification, collection, proper hauling, importation/exportation, disposal and possible end uses of used and waste tires;
- Increase cost of inappropriate disposal of tires such as illegal dumping or illegal stock-pilling through greater enforcement and stiffer penalties;

# Adopted Recommendations (cont)

- Encourage proper disposal through incentives;
- Encourage better understanding of problem and unique dynamics of transboundary used/ waste tires;
- Promote tire recycling and expansion of markets for effective end uses;
- Development of short term and long term strategies

### **Actions**

- California Legislation SB 772 (2005)
- Aimed at enhancing ability to establish goals for waste tires along the CA – Baja CA border;
- Established training programs to assist
  Mexican tire haulers meet CA requirements;
- Development of waste tire abatement plans;
- Tracking flow of waste tire across the border;
- Coordination with businesses to apply environmental / control requirements

#### **Actions**

- Nuevo Leon Legislation 2005
- Amendment to state's environmental law to address management and disposal of waste tires. Among other things, it calls for registration of companies that haul waste tires and their proper disposal.

#### **Actions**

- Continued input with Border 2012 process;
- Communication and input with Border Governors Conference Environment Work Table;
- Solicitation of ongoing status reports and presentations from SEMARNAT / US EPA regarding progress of Border 2012 Program

# **New Developments**

- Joint BLC Environment Work Table Mtg.
  March 18-20 in San Francisco, CA
- Aimed at enhancing executive legislative collaboration on the issue of waste tires
- Goal is to identify concrete, state driven actions and specific follow-up between individual legislators and the secretaries of the environment of the border states

## **New Developments**

- BLC is looking into partnerships with Universities to identify research opportunities on environmental issues;
- Specifically, BLC interested in these partnerships to enhance legislative research capacity to produce regulatory frameworks to address waste tires;

## **New Developments**

- Tamaulipas Adopted Legislation (2009)
- Amendment to Sustainable Development Code of the State of Tamaulipas
- Waste tires shall be deposited in established sites for their final disposition;
- Prohibits dumping of used/waste tires in open or abandoned areas;
- In conjunction with the State's Ministry of Economic Development and Employment, to conduct actions for the marketing of final uses;

## New Developments – Tamaulipas Law

- Persons involved in the productive chain of the tire industry, such as producers, importers, exporters, distributers and consumers, shall participate in programs of the state's environmental agency;
- The state's Environmental Agency, in coordination with municipalities and private sector, will promote the development of infrastructure for the management and final disposal of waste tires
