Documents received as pdfs are paginated on the first page only, for example (16-30), and are noted in the table of contents accordingly. Documents originally received as MS Word documents are paginated sequentially. To return to the table of contents, go to file (upper left of screen) and click close.

*Monday, September 24, 2007
Keynote*

Progress Has Been Made in Characterizing Fractured Rock Aquifers: But What Are the Implications for Remediation?
Allen M. Shapiro 1

The Effect of Matrix Diffusion on the Results of Large-Scale Tracer Experiments in a Fractured Dolomite
Kent Novakowski 2

*Day One, Track One
Session: Geophysics and Aquifer Testing*

Azimuthal Self Potential Characterization of Hydraulic Anisotropy in Fractured Rock Aquifers
Lee D. Slater, Debonne Wishart, and Alexander Gates 3

The Potential for Compromised Interpretations When Based on Open Borehole Geophysical Data in Fractured Rock
Peeter Pehme, Beth L. Parker, John A. Cherry, and John P. Greenhouse..... 4-15

Analysis of Cross-Hole Tests in Fractured Systems Randall M. Roberts and Dale O. Bowman	16-30
The Evolution of Planning, Performing, and Evaluating Aquifer Test Data for a Complex Fractured Bedrock Environment Charles Malaniak, David Li, and Gordon Jamieson.....	31-45
Non-Radial Aquifer Test Responses at Large Scales in Fractured Aquifers Nathaniel J. Toll, Randall M. Roberts, and Richard L. Beauheim.....	46
Influence of Fracture Intensity on Flow Dimension in Well Tests Thomas W. Doe and Doo-Hyun Lim	48
Dual Porosity Aquifer Investigation: The Importance of Understanding Actual Site Conditions and Implications for Remediation John W. Oneacre and James F. Spicer.....	49
Hydraulic Characterization of a Fractured Bedrock Aquifer Willard A. Murray	50-64
Liners and Packers: Similarities and Differences Carl Keller	65-76
 <i>Day One, Track Two</i> <i>Session: Bioremediation</i>	
Preparation for Enhanced Bioremediation in a Chlorinated Ethene-Contaminated Fractured Crystalline Rock Montgomery S. Bennett, Jonathan P. Waddell, J. Rusty Field, and Kent S. Novakowski.....	77
Microcosms for TCE Bioremediation in Fractured Rock Aquifers Stephen J. Druschel, Nancy E. Kinner, Jennifer Jencks, and Whitney H. Blanchard	79
Long-Term Bioremediation in a Fractured Limestone Aquifer Using a Dechlorinating Bioreactor Charlotte Riis, Anders G. Christensen, Henrik H. Nielsen, Marc Van Bommel, and Henrik Østergaard.....	80
 <i>Day, One, Track Two (cont.)</i> <i>Session: Chemical Oxidation</i>	
Electrokinetic Enhanced Oxidant Flooding of Unfractured Rock David A. Reynolds, Edward Jones, and David G. Thomas.....	80-91

Field-Scale TCE Oxidation in Sedimentary Bedrock: Extended Pilot Application Design and Implementation

Michael J. Gefell, Darren A. Szuch, Kenneth L. Sperry, and Edward Kolodziej92

Assessment of TCE Oxidation by KMnO₄ Using Stable Carbon and Chlorine Isotopes at a Fractured Bedrock Site

Jordi G. Helsen, Ramon O. Aravena, Min Zhang, Orfan Shouakar-Stash, and Mary Siew 94-107

Full-Scale Permanganate Remediation of Chlorinated Ethenes in Fractured Shale: Part 1. Site Characterization and Design and Implementation of Full-Scale Remedy

Ken Goldstein, Andrew R. Vitolins, Daria Navon, Steven W. Chapman, Beth L. Parker, and Tom A. Al108

Full-Scale Permanganate Remediation of Chlorinated Ethenes in Fractured Shale: Part 2. Three Year Interim Evaluation of Treatment Performance

Steven W. Chapman, Beth L. Parker, Kenneth J. Goldstein, Andrew R. Vitolins, Daria Navon, and Tom A. Al 110

*Day One, Reception
Poster Session*

Temporal Variation of Sediment Distribution in a Karst Aquifer, Easton, Pennsylvania

Ethan E. Prout 112

Change in Biogeochemistry and Chloroethene Degradation Potential with Depth in a Fractured Bedrock Borehole at NAWC Trenton

Paul M. Bradley and Francis H. Chapelle113

Solute Plume Attenuation Attributable to Matrix Diffusion in Various Rock Types

J.G. Matthew and Bernard H. Kueper 114

Site Characterization and In Situ Pilot Remediation at an Oil Contaminated Soil Site in Korea

Sang Yong Chung, Dong Hwan Kang, Byung Woo Kim, Minhee Lee, and Namsik Park ..115

Assessing the Influence of Ground Water Inflow on Thermal Conductive Heating in Fractured Rock

D. Baston, B.H. Kueper, and G. Heron 116-130

State of the Practice in Geothermal Well Design and Installation – Common Problems and Lessons Learned

John Kastrinos, Paul Ormond, and Reidar Bomengen131

Numerical Simulation of ISCO to Remediate DNAPL in Fractured Rock

TiWee Pang, Jason Gerhard, and Bernard H. Kueper 133-147

Solutions to the Key Problems in Drilling
Ian Woo148

Tuesday, September 25, 2007
Plenary

Detecting Otherwise Hidden Fracture Zones with Borehole Flow Measurements
Frederick L. Paillet149

Chlorinated Solvent Source and Plume Behavior in Fractured Sedimentary Rock from Field Studies
Beth L. Parker 150-168

Day Two, Track One
Session: Regional Scale Geology and Hydrogeology

Fracture Characterization Mapping for Regional Geologic Studies: The Hydrostructural Domain Approach, Ayer Quadrangle, Massachusetts
Stephen B. Mabee and Joseph P. Kopera 169-186

Insignificant Ground Water Discharge in a Fractured Rock Watershed
Tom Gleeson, Kent Novakowski, and Kurt Kyser187

Hydrogeological Behavior of Fractured Shallow Aquifers: A Case Study in the Vieira Do Minho Granite Area (New Portugal)
Luís Macedo and Alberto S. Lima..... 188-202

Development of Regional-Scale Conceptual Models of Ground Water Flow in the Fractured Crystalline Bedrock Aquifers of the Nashoba Terrane Using Borehole Geophysical Techniques and Outcrop Data
John Patrick Diggins, David F. Boutt, and Stephen B. Mabee..... 203-206

Investigation and Identification of a Chlorinated Ethene Source Zone in a Fractured Crystalline Rock
Montgomery S. Bennett, Jonathan P. Waddell, J. Rusty Field, and Kent S. Novakowski.....207

Day Two, Track One
Session: Characterization and Drilling Techniques

Integration of Investigative Methods to Assess a Porous Medium vs. Fracture Flow Approach in Fractured Bedrock Systems
David Winslow, Maurice Ponti, Matthew Jacob Gozdor, and Matthew Barvenik 209-219

A Comparative Evaluation of Some Type-Curve Methods for the Determination of Hydraulic Parameters of Fractured Rocks

Vedat Batu 220-234

Diffusivity Mapping of Fracture Interconnections

Richard L. Beauheim 235-249

Using a Combination of Drilling Methods and Casing Advancement to Overcome Bedrock Borehole Instability

John N. Dougherty, Joseph J. May, Steve Laramee, and Robert M. Alvey250

Road Salt in Bedrock: An Unintended Legacy?

Joshua Katz254

Day Two, Track One

Session: Geochemical Characterization

Effect of Depth and Geochemical Conditions on Distribution of Uranium and Radium in Ground Water in Fractured Bedrock, Central New Jersey

Zoltan Szabo255

Integrated Geostatistics and Gis Techniques for Assesseing Ground Water Contamination in Al Arish Area, Sinai, Egypt

Mohamed M. El Alfy and Broder J. Merkel..... 256-270

Role of Connate Ground Water Movement in the Degradation of Aquifer and Production Water Well Yield

Philip Getty 271-275

Laboratory Treatability Study to Compare the Potential for Reductive Dechlorination in the Bedrock Zone, Bedrock Interface Zone, and Perched Zone

Talaat Balba, Sophia Dore, Donald Pope, Jennifer Smith, and Alan Weston276

Day Two, Track Two

Session: NAPL Case Studies

Risk Management of DNAPL Sites in Fractured Sedimentary Bedrock

Michael R. Noel and Thomas Miazga277

Successful DNAPL Remediation Using Radio Frequency Heating and Return to Thermal Equilibrium

Karen L. Brody, R. Joseph Fiacco, Alicia Kabir, Maelle Duquoc, Johannes Mark, and Raymond Kasevich278

Remediation of Rapidly Moving LNAPL in Bedrock Under Emergency Conditions in an Alpine Setting, Washington State

James A. Miller..... 280-292

Day Two, Track Two

Session: Fracturing and Blasting

Evaluation of Environmental Fracturing as a Remediation Aid in Clayey Till

Camilla Christiansen, Mette M. Broholm, Peter Bauer-Gottwein, Poul L. Bjerg, Charlotte Riis, Anders G. Christensen, Stine B. Christensen, Knud Erik S. Klint, and Judith S.A. Wood..... 293-297

Blast Fracturing: Installation and Evaluation of a Fractured Bedrock Zone Within Granitic Bedrock at Edwards AFB

Mark D. Henkes, Sarah Grossi, Doug Britton, and Patrice Hallman 298-311

Performance of Hydraulic Fracturing for “In Situ” Stimulation and Remediation of Contaminated Fractured Soils

Knud Erik S. Klint, Nilsson Bertel, William Slack, Thomas Broeker, Christos D. Tsakiroglou, Christos Aggelopoulos, Dimitra Tzovolou, Frank Haeseler, Yves Benoit, Phillippe Delaplace, Tomasz Kasela, and Jeczalik Maciej 312

Day Two, Track Two

Session: Ground Water Remedies: Pump and Treat and More

Workshop: Aquifer Characterization and Modeling in Support of TI Waiver Application

Neven Kresic, Alex Mikszewski, Ken Goldstein, and Beth L. Parker 314

Case History: Remediation of Fractured Bedrock Aquifer Containing TCE DNAPL

Jeffrey P. Orient, Lonnie Monaco, Ronald A. Sloto, and Kathryn L. Davies 315-327

Geology Matters: Updating a Bedrock Ground Water Remedy at a New Jersey Site in the Newark Basin

James L. Peterson 328-342

Plume Detachment and Recession Times Following Source Treatment in Bedded Fractured Rock

Michael R. West and Bernard H. Kueper 343-356

Day Two, Track Three

Session: Conceptual Models

Conceptual Model of Tropically Weathered and Fractured Crystalline Bedrock and Its Implications for In Situ Chemical Oxidation Sasha Tom Hart, Fernando Alves, and Jean Cho	357-369
Influence of Highly Permeable Geologic Structure on Inflows to A154 N/S Open Pit, Diavik Diamond Mines Inc., Lac de Gras, Northwest Territories Jeff R. Reinson, Don W. Chorley, Steve F. Rogers, John V. Wozniewicz, and Willy Zawadzki.....	370
Conceptual Flow Model of Hydrocarbon-Impacted Ground Water in Undifferentiated Gneiss Shantar Zuidema and Jeffrey R. Hale.....	372-384
Applying Tidal and Density Corrections at a Coastal, Fractured Bedrock Aquifer Matthew H. Daly, John Drobinski, Franklyn D. Legall, and Bernard H. Kueper	385
Bedrock Structural Analysis: Implications for Conceptual Site Models and Optimization of Bedrock Monitoring Networks (Case Studies) Bill Brandon and Rob Hoey	387
 <i>Day Two, Track Three</i> <i>Session: Matrix Diffusion</i>	
Upscaling Matrix Diffusion Coefficients for Heterogeneous Fractured Rocks Zhenxue Dai, Andrew Wolfsberg, and Zhiming Lu.....	388
Measuring Diffusion and Distribution in a Porous Fractured Medium: Lessons for Remedial Strategies James E. Wedekind, Kenneth R. Bradbury, Peter M. Chase, Madeline B. Gotkowitz, Kris D. Krause, and John M. Rice	389-402
An Advanced Method for Rock Core VOC Contaminant Analysis Jonathan Kennel, Tadeusz Górecki, Beth L. Parker, and Maria Gorecka	403
 <i>Day Two, Track Three</i> <i>Session: Isotopes and Tracer Tests</i>	
The Contribution of Isotope Data for the Establishment of Aquifer Protection Areas Ana Carla V. Oliveira and Alberto S. Lima	405-417
A Novel Tracer Experiment Conducted from Ground Surface in a Fractured Bedrock Aquifer Jana K. Levison and Kent S. Novakowski	418
Using $\delta^{18}\text{O}$ and δD to Investigate Ground Water-Surface Water Interaction and Recharge in a Gneissic Terrain, Perth, Ontario Titia W. Praamsma and Kent S. Novakowski	419

Day Two, Track Three
Session: Karst Environments

Characterizing a VOC Plume Migrating from Fractured Shale into a Karst Limestone Aquifer
Paul G. Landry, Paul R. Stone, and Bryan Hoke..... 420-432

Problems with Applying Traditional Characterization and Monitoring Approaches to Karst Aquifers: A Case History
Keith A. White and Ralph O. Ewers.....433

The Use of Geophysical Methods in a Multi-Component Investigation of a Karst Feature in North Alabama
John M. Bartos, Robert K. Davis, Christine Paul, and Bradley Carr434

Wednesday, September 26, 2007
Plenary

Ground Water Remediation at the W.R. Grace Property, Wells G & H Superfund Site, Woburn, Massachusetts: Fifteen Years of Progress
John H. Guswa, Jonathan R. Bridge, and Maryellen Johns..... 435-449

Evaluating Ground Water Supplies in Fractured Metamorphic Rocks of the Blue Ridge Province in Northern Virginia
Robert M. Cohen, Charles R. Faust, and David C. Skipp 450-464

Day Three, Track One
Session: Numerical Modeling

Modeling Impacts of Residual DNAPL Dissolution in Vadose and Saturated Zones of Fractured Aquifers
Neven Kresic and Alex Mikszewski.....465

A Comparison of a Fully Numerical Solution and a Semi-Numerical Solution Based on Streamlines for the Simulation of Transport in Fractured Rock
Morgan Schauerte, Kent S. Novakowski, and Brian Moore466

Comparison of Alternative Numerical Models to Represent Permeability Anisotropy in Fractured-Sedimentary Rock
Richard M. Yager 467-479

Discrete Fracture Network Modeling of Hydrostructural Domains: An Example from Eastern Massachusetts
Alex K. Manda, Stephen B. Mabee, and David F. Boutt 480-488

Numerical Analysis of Heat Transport Within Fractured Sedimentary Rock: Implications for Temperature Probes

John W. Molson, P. Pehme, John A. Cherry, and Beth L. Parker 489-502

Estimation of Transmissivity Using Non-Radial Flow Dimensions

Dale O. Bowman and Randall M. Roberts 503-516

Comparison of Stair-Step and Dipping-Layer Approaches for Simulation of Flow and Advective Transport in Fractured-Sedimentary Formations

Daniel J. Goode and Ying Fan.....517

*Day Three, Track One
Session: Field Studies*

Hydraulic Gradients in Recharge and Discharge Areas and Apparent Ground Water Age Dates from the Characterization of Multiple Regolith-Fractured Bedrock Ground Water Research Stations in North Carolina

Melinda Chapman, Melissa Schlegel, Brad A. Huffman, and Kristen B. McSwain..... 518-521

Mapping of Pressure-Head Responses of a Fractured Rock Aquifer to Rainfall Events

Michael Hillesheim, Nathaniel J. Toll, and Lauren A. Hillesheim 522-536

Hydrogeological Characterization and Modeling of a Fractured Limestone Aquifer

Annette Pia Mortensen, Charlotte Riis, Anders G. Christensen,
and Henrik Jannerup 537-550

Field Test of a Cross-Hole Fracture Model

Edwin A. Romanowicz, David A. Franzi, and Frederick L. Paillet551

High Resolution Head Profiles Used to Define Hydrogeologic Units for Improved Characterization of a Contaminated Fractured Sedimentary Rock Site

Jessica R. Meyer, Beth L. Parker, and John A. Cherry552

*Day Three, Track Two
Session: Combining Remediation Technologies*

Remediation of Arsenic and Lead from Water Using Low Cost Adsorbents

Jyotsna Lal553

The Art in Well Technology: Effectively Treating 1,4 Dioxane and Chlorinated Solvents in Fractured Rocks

Marco M. Odah.....554

Analysis of Organic Carbon (Foc) in Fractured Bedrock

James R.Y. Rawson and Thomas R. Eschner 555-563

Managing Remedial Costs in a Complex Geologic Setting
 Robert H. O’Laskey, Neven Kresic, Kenneth J. Goldstein, Rula Deeb, Allan T. Jenkins,
 Brian E. Caldwell, and Frank R. Bogle564

Day Three, Track Two
Session: Technical Impracticability

**Technical Impracticability Waiver as a Component of a Site-Wide Remedy at a Fractured
 Bedrock Superfund Site in New England**
 Thomas R. Eschner, James R.Y. Rawson, and John H. Guswa 565-579

Assessing Technical Impracticability in a Karst Setting
 Robert H. O’Laskey, Elisabeth L. Hawley, Michael C. Kavanaugh, Bridgett Lyons,
 and Laurie Haines580

**Source Zone Remediation in Fractured Bedrock: Relating the Decision Process to Available
 Data**
 John Fountain.....581

Day Three, Track Three
Session: Workshop on Fate, Transport, and Remediation

**Workshop on Fate, Transport, and Remediation of Chlorinated Solvents in Fractured
 Sedimentary Rocks at the Former Naval Air Warfare Center, West Trenton, New Jersey**
 Claire R. Tiedeman, Daniel J. Goode, Pierre J. Lacombe, Paul M. Bradley, William C. Burton,
 Francis H. Chapelle, Gary P. Curtis, Karl J. Ellefsen, Thomas E. Imbrigiotta, Carole D. Johnson,
 Kinga M. Revesz, Marjorie S. Schulz, Allen M. Shapiro, John H. Williams, Mary F. De Flaun,
 and Paul A. Hsieh582
